

## **MSAP** MINDCLICK SUSTAINABILITY ASSESSMENT PROGRAM

# MSAP: The Ratings Powering Design for Health™

Created by designers for designers and in collaboration with Marriott International and vendors.

Millions of consumers are seeking better human and environmental health and hundreds of vendors are working hard to support them.

What empowers these vendors? MSAP.

# MSAP MINDCLICK SUSTAINABILITY ASSESSMENT PROGRAM

## The story behind MSAP

It all started in 2011 when MindClick created the Hospitality Sustainable Purchasing Consortium (HSPC) to solve the complexity around sustainability.

Joined by Marriott International, the U.S. Green Building Council, 20 FF&E vendors, design firms, and purchasing companies, the members of the HSPC created a framework to measure the social and environmental impacts of vendors and their products.

**From this framework, MSAP was born.**

MindClick assigns a score out of a possible 200 points based on 9 key metrics. 3rd party audits, certifications and eco-labels provide the proof points.

**MATERIALS**  
24 / 30

**CHEMICALS**  
17 / 25

**MANUFACTURING**  
19 / 25

**HUMAN RIGHTS**  
29 / 30

**PACKAGING**  
25 / 25

**DISTRIBUTION**  
4 / 15

**FACILITIES**  
15 / 15

**HEALTH**  
10 / 10

**END OF USE**  
22 / 25

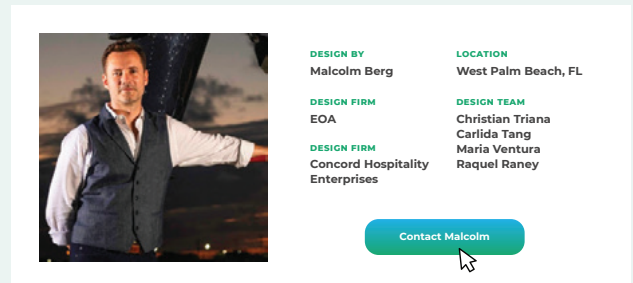

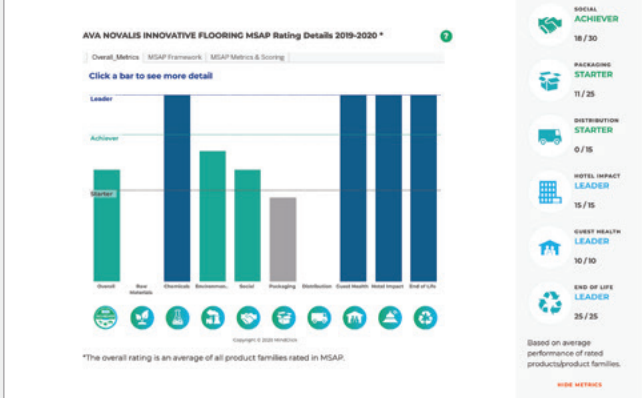

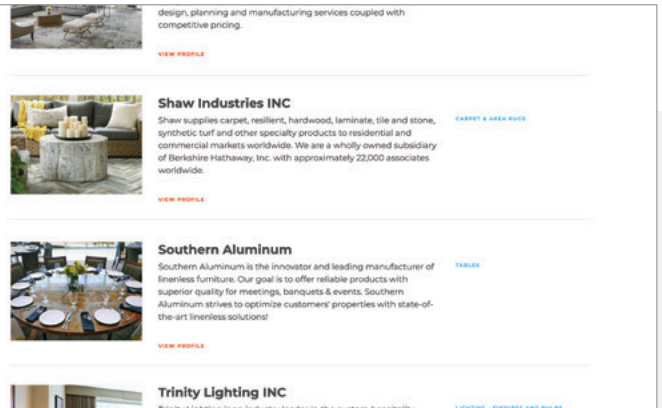

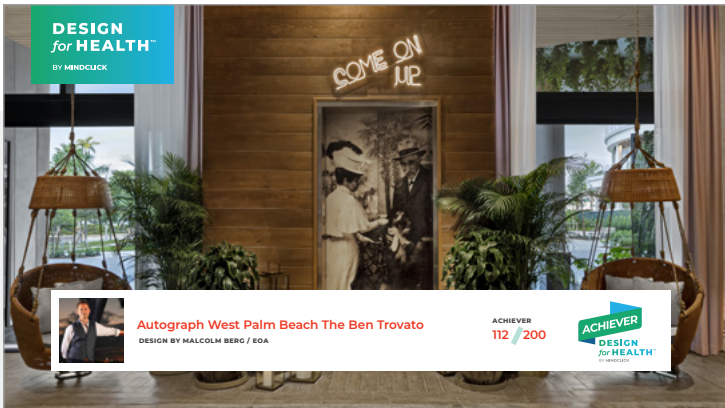

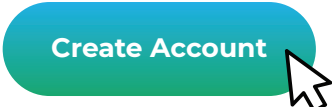

## MSAP ratings

Through MSAP, every vendor and product receives a good, better, best rating—called **Starter, Achiever, Leader**—of the social and environmental impacts of their products. MSAP product ratings are then averaged to create an overall MSAP vendor rating.

Now you can put MSAP ratings to work for your projects, your clients, your design leadership and the planet.
