The GENESIS of EXCEPTIONAL

It all began in 1916, when Thermador broke boundaries with the first built-in heaters. We've since invented the wall oven, the patented Pedestal Star® Burner, and exclusive Culinary Preservation Centers.

DISTORTS

Experience unparalleled performance and leading innovations across cooling, cooking, and dish care—and learn why Thermador products are nothing less than exceptional.

The MASTERPIECE COLLECTION

Updated with vibrant color displays, stunning metallic gray glass, and contemporary handles crafted with high-quality stainless steel, the Masterpiece look allows for flexibility to harmonize different products in the same space.

Carefully crafted to suit the ambitious desires of real cooks, the entire collection has been updated with vibrant LCD displays, stunning metallic gray glass, and dramatic handles crafted with high-quality stainless steel.

COLLECTION

The

PROFESSIONA

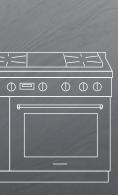

And the second second second

Spotlight Feature

The Thermador patented Pedestal Star® Burner unique star shape allows for superior flame distribution with 56% more coverage, resulting in a reduced cold spot and more precise control over everything you cook.

RANGES FOR THE PROFESSIONAL COLLECTION

Our collection of Pro Grand[®] and Pro Harmony[®] Ranges offer a variety of sizes and styles, and are engineered to suit both large and compact kitchens.

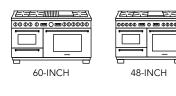

PRO HARMONY[®] GAS RANGE

48-INCH – PRG486WDH

FEATURES

PROFESSIONAL RANGES

30-INCH

★ QuickClean Base®

The raised, patented Pedestal Star® Burner and porcelain maintop have been crafted for stunning design and easy cleanup. A hand and sponge fit easily under each burner to wipe the surface clean, and teardrop emboss reduces food buildup near the base.

Telescopic Racks

Full Access® telescopic racks glide smoothly on ball bearings, allowing them to expand completely for safe, easy access. Additionally, robust construction safely supports the heaviest dishes while integrated easy-grip handles make them easy to use.

Single Fan Technology

Our convection technology is so powerful that only one fan is needed. Convection keeps the temperature consistent throughout the cavity and allows for multi-rack cooking, while controlled airflow patterns optimize the transfer of heat so food is heated evenly.

Star-K Certified

Thermador Professional® Ranges are Star-K certified making it possible to use them on the Sabbath or the Holidays.

A Touch of Bold Adorn your rangetop with a personal touch. Our cast metallic knobs in signature Thermador Blue are sure to bring an artistic allure to any culinary space.* *Sold separately; see accessories section, pages 116-117

Star Burner: up to 50 ports / 16 ³/4" perimeter

Conventional Burner: 28 ports / 10 ³/4" perimeter 🖈 ExtraLow®

Our ExtraLow feature provides a wide range of temperature control. It cycles the patented Pedestal Star[®] Burner on and off to maintain a very low temperature. Perfect for simmering delicate sauces or keeping food warm without scorching or stirring.

FEATURES

PROFESSIONAL RANGES

Select Professional Ranges

Color TFT Display

The TFT display panel offers a vibrant, full-color touchscreen display that lets you easily adjust settings*. *Available on all models with the exception of 30" Pro Harmony models

★ Fast Self-Clean

In as little as 1.5 hours, the interior walls and rack supports become clean, thanks to the leading self-cleaning cycle on the market*.

*Self-clean not available on Pro Harmony gas ranges

***** Pro Indoor Grill

Easy-to-clean, indoor grilling feature boasts industry-leading design, featuring ceramic briquettes and fusion coated grill plates that fully cover the heating elements to offer exceptional grilling performance with genuine smoky flavor while minimizing flare-ups. 2 heating zones let you control the front and back zones independently.

True Convection

True Third Element convection means you can cook multiple dishes—up to 5 levels of sheet pans—with even baking results and no flavor transfer.

Removable Griddle and Grill Accessory

Our 12" non-stick, corrosion resistant cast-aluminum easyclean coated surface griddle is thermostatically controlled to deliver consistent, even heating across the entire surface. It is also removable for easy cleaning or interchange it with our grill accessory*. Our non-stick, rust-proof cast-aluminum grill accessory features an easy-clean coated surface that is dishwasher-safe.

*Grill accessory sold separately

★ Thermador[®] Connected Experience

With features including remote start, recipe suggestions, and cooking tips, the Thermador Connected Experience by Home Connect[™] is designed to enhance your cooking experience*.

*Available within large ovens on all models with the exception of 30" Pro Harmony models

PRO HARMONY®

PROFESSIONAL RANGES 24-INCHDEPTH

Counter-depth Thermador Pro Harmony® Ranges have milled stainless steel knobs, bullnose front, and a color TFT display on select models*.

★ 5 Burners, 30-Inch Footprint, Zero Clearance

The powerful, patented Pedestal Star® Burners fire up to a total of 59,000 BTUs yet only require 300 CFM venting. Thanks to an innovative technology this allows for a flush installation against a kitchen wall with zero clearance for complete design flexibility.**

**When compared to professional ranges with traditional BTU output

Truly Flush Mounted Range

Pro Harmony Ranges are designed to fit perfectly flush in standard 24" depth cabinets.

18,000 BTU Patented Pedestal Star[®] Burners

Delivers superior cooking flexibility by offering maximum heat out put on front burners.

Exceptional Oven Capacity

36" models offer up to 5.1 cubic feet capacity that accommodates even the largest meals effortlessly.

*Not available on 30" models

PRO GRAND®

PROFESSIONAL RANGES 27-INCHDEPTH

Featuring bold, iconic design elements including temperature gauge, color TFT display, bullnose front, and milled stainless steel knobs with down lighting, Pro Grand® Ranges stand out with the quality craftsmanship and close attention to detail that only Thermador delivers.

★ Liberty[®] Induction Module

Available on the 36" and 48" range sizes, the Liberty Induction Module features two induction zones for added flexibility, plus HeatShift[®] technology, which automatically adjusts the heat when a pot or pan is moved from one zone to the other.

Color TFT Interface

Get set for culinary success. The TFT display panel offers a vibrant, full-color touchscreen display that lets you easily adjust settings.

★22K Patented Pedestal Star[®] Burner

Our powerful, patented Pedestal Star Burner delivers 22,000 BTU of pure cooking power for better searing and faster boiling.

★ SoftClose[®] Hinges

Hydraulic SoftClose hinges prevent slamming and ensure ultra smooth closing of both ovens and the warming drawer.

Extra Large Oven Capacity

Our 36" and select 48" ovens within our Pro Range collection offer a maximum capacity of up to 5.7 cubic feet and can accommodate full-sized commercial sheet pans.

PRO GRAND®

PROFESSIONAL RANGES

★ Faster Boiling Time

Our patented Pedestal Star[®] Burner provides up to 22,000 BTU/hr of output with a superior heat distribution that boils water in a fraction of the time compared to a conventional range or cooktop.

Multi-Point Temperature Probe

The multi-point temperature probe utilizes multiple cooking points for added precision and consistency.

\star Large Capacity

60" Pro Grand Range accommodates professional-grade catering trays, and select models' secondary oven has more capacity than the competition's primary 30" ovens. At a massive 10.6 cubic feet, it has the largest combined oven cooking capacity on the market.

★ Dual Zone, Double Griddle

The 60" Pro Grand Range is available with a large dual zone, double griddle, perfect for cooking both delicate recipes, as well as searing at high temperatures.

Flush Wall Install

The 60" Pro Grand Range is the first of its size that can be installed flush against a combustible wall* with zero clearance for pure, unadulterated design flexibility.

*As defined in the "National Fuel Gas Code" (ANSI Z223.1, Current Edition)

PRO GRAND®

PROFESSIONAL RANGES STEAM

With a steam and convection combination oven, full size convection oven, warming drawer and multiple cooktop configuration options, the Thermador Pro Grand Range collection also combines a bold design with easy-to-clean surfaces and exclusives, like our patented Pedestal Star® Burner.

★ Seven Cooking Options

Both the 60" and 48" Ultimate Culinary Center® feature seven distinct cooking options including ExtraLow® simmering technology, 22,000 BTUs of cooking power, scratch resistant coated surface Griddle & Grill or Double Griddle, a large capacity Convection Oven, Warming Drawer and Steam & Convection Oven.

★ Liberty[®] Induction Module

Available on the 48" model, the Liberty Induction Module features two induction zones for added flexibility, plus HeatShift® technology, which automatically adjusts the heat when a pot or pan is moved from one zone to the other.

★ Steam and Convection Oven

The award-winning oven offers three distinct cooking variations: Steam only, Convection only or Steam and Convection Cooking which makes food crisp on the outside and moist on the inside.

★ Dual Zone, Double Griddle

The 60" Pro Grand Range is available with a large dual zone, double griddle, perfect for cooking both delicate recipes, as well as searing at high temperatures.

★ Warming Drawer

The spacious warming drawer featuring 3 power levels uses a powerful element to ensure quick and even heating.

PRD486WLHU **48-INCH DUAL-FUEL PRO HARMONY® RANGE** WITH GRILL

PROFESSIONAL SERIES, STANDARD-DEPTH, PORCELAIN COOKTOP SURFACE

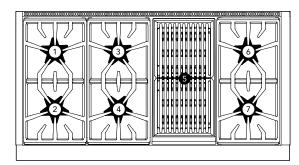

FEATURES & BENEFITS

- ★ The Star[®] Burner delivers superior flame spread for more even heating
- ***** ExtraLow[®] feature provides a wide range of temperature control, perfect for simmering delicate sauces
- ★ Superfast 2.5-hour self-clean mode-fastest in the industry - Superior grilling results, thermostatically controlled for even heating
- Powerful third element convection for cooking on multiple levels

TECHNICAL DETAILS	
Circuit Breaker	50 A
Volts	240 / 208 V, 60Hz 4 Wire
Energy Source	Gas and Electric
Plug Type USA	No Plug
Power Cord Length	Purchase Separately
Gas Supply	3/4"
WARRANTY	
Limited Warranty, Entire Appliance, Parts and Labor	2 Year

*Models PCG305xx, PRD305xx, PRD606xx, PRG305xx, PRG304xx and PRD304xx are suitable for 0" rear clearance to combustible surfaces. All other models: when using the included Island Trim a minimum 6" (152 mm) rear clearance is required to a combustible surface. When installing against a combustible surface, a Thermador[®] Low Backguard is required for a 0" rear clearance to the combustible surface. A Thermador Low Backguard must be purchased separately. A rear clearance to a surface covered in a noncombustible material (metal, ceramic tile, brick, marble, or stone) is 0" when using the included Island Trim. Clearances of less than 6" (152 mm) should be approved by the local codes and/or by the local authority having jurisdiction. Clearances from non-combustible materials are not part of the ANSI Z21.1 scope and are not certified by CSA.

PRO HARMONY® PLANNING INFORMATION

Professional Ranges

Model Options

There are three sizes of Thermador Pro Harmony Ranges to choose from — 48-inch, 36-inch and 30-inch. Models are available in your choice of all-gas or dual-fuel configurations. Pro Harmony Ranges feature a compact, 24-inch deep design in stainless steel with a porcelain cooktop surface. Ranges are LP convertible by ordering the specified kit. Be sure to reference the correct model information in this design guide.

Installation Considerations

The information in this design guide provides key features, product dimensions, cutouts and installation specifications. Before installing a Thermador Pro Harmony Range, be sure to verify the cutout dimensions and electrical / gas connections. Also, always consult with the installation manual packed with the product for complete details before installing.

Installation Options

Thermador Pro Harmony[®] Ranges feature a bold, professional design and a compact, 24-inch depth profile that creates a seamless look within standard cabinetry. These ranges can be installed in a wall or island installation.

Ventilation Requirements

We strongly recommend that a Thermador Professional® Wall or Island Hood or Custom Insert be installed with all Thermador Pro Harmony Ranges. Reference the selection guide in the ventilation section for compatible Thermador hoods. Downdraft ventilation should not be used. Do not install a microwave-hood combination above the cooktop, as these types of units do not provide the proper ventilation and are not suitable for use with Thermador Pro Harmony Ranges.

Important Ventilation Notes:

- For wall installations, the hood width must, at a minimum, equal the nominal width of the appliance cooking surface. Where space permits, a hood larger in width than the cooking surface may be desirable for improved ventilation performance.
- For island installations, the hood width should, at a minimum, overhang the appliance cooking surface by 3" on each side.
- Due to the high heat capability of these ranges, particular attention should be paid to the hood and duct work installation to assure it meets local building codes.
- For best smoke elimination, the lower edge of the hood should be installed 30"-36" above the appliance cooking surface.
- If the hood contains any combustible materials (i.e., a wood covering), it must be 36" or greater distance above the cooking surface.

Electrical and Gas Specifications

Be sure your appliance is properly installed and grounded by a qualified technician. Installation, electrical and gas connections, and grounding must comply with all applicable local codes.

Natural Gas or LP

Thermador Dual-Fuel Pro Harmony Ranges are shipped by the factory to operate on natural gas. They must be converted for use with propane. Verify that the type of gas being used at the installation site matches the type of gas used by the appliance. If the location / job site requires conversion from natural gas to propane (LP), order an LP conversion kit. Field conversion must be done by qualified service personnel only. Please refer to the LP Conversion Instructions packed with product for further information.

A manual gas shut-off valve must be installed external to the appliance, in a location accessible from the front, for the purpose of shutting off the gas supply. The supply line must not interfere with the back of the unit.

Natural Gas Requirements:

- Inlet Connection: 3/4" NPT external, 1/2" NPT internal (Minimum 3/4" diam. flex line.)
- Supply Pressure: 6" min. to 14" max. water column. (14.9 mb to 34.9 mb)
- Manifold Pressure: 5" water column (12.5 mb)

Propane Gas Requirements:

- Inlet Connection: 3/4" NPT external, 1/2" NPT internal (Minimum 3/4" diam. flex line.)
- Supply Pressure: 11" min. to 14" max. water column. (27.4 mb to 34.9 mb)
- Manifold Pressure: 10" water column (24.9 mb)

High Altitude:

High altitude kits are available for Thermador Pro Harmony Ranges. Reference the Accessory chart or Contact Customer Support for details.

PRO HARMONY® PLANNING INFORMATION

Professional Ranges

Dual-Fuel:

Thermador Pro Harmony Dual-Fuel Ranges are dual rated, designed to be connected to either 240 / 208V AC, 60 Hz, 4-wire, single-phase power supply. The connection may be made with a range supply cord kit (purchased separately) or by hard-wiring to the power supply. A dedicated circuit breaker is required.

Model	Required Circuit Breaker
	240 / 208V AC, 60 Hz
PRD486WLHU	50 A
PRD486WDHU	50 A
PRD484WCHU	50 A
PRD364WLHU	30 A
PRD364WDHU	30 A
PRD366WHU	30 A
PRD305WHU	30 A
PRD304WHU	30 A
	· ·

All-Gas:

Thermador Pro Harmony All-Gas Ranges are equipped with a 3-wire plug and are designed to be connected to a 120V AC, 60 Hz, singlephase power supply. A dedicated circuit breaker is required.

Model	Required Circuit Breaker
	120V AC, 60 Hz
PRG486WLH	20 A
PRG486WDH	20 A
PRG364WLH	20 A
PRG364WDH	20 A
PRG366WH	15 A
PRG305WH	15 A
PRG304WH	15 A

Electrical Supply

IMPORTANT: The cord supplied with gas ranges having an electric griddle requires a NEMA 5-20 receptacle as shown here. Local codes my require a different wiring method. NEMA 5-20 RECEPTACLE

WARNING: This appliance is equipped with a three-prong grounding plug for protection against shock hazard and should be plugged directly into a properly grounded receptacle. DO NOT cut or remove the grounding prong from this plug. DO NOT ALTER THIS PLUG.

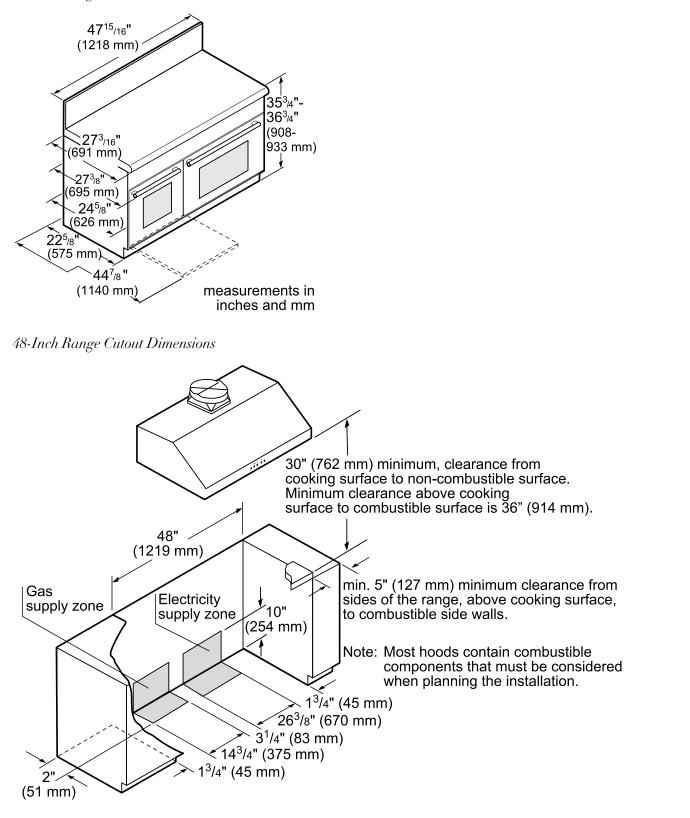

Electrical and Gas Locations

Typical placement of the electrical and gas supply can be found within the "Cutout and Range Dimensions" located on the installation pages. Alternate placement within the supply zone is acceptable. Dual-Fuel ranges may be connected to the power supply with a range supply cord kit (sold separately) or by hard-wiring to the power supply. All-gas ranges may be connected to the power supply with the supplied range cord or by hard-wiring. It is the responsibility of the installer to provide the proper wiring components (cord or conduit and wires) and complete the electrical connection as dictated by local codes and ordinances and/ or the National Electric Code. The units must be properly grounded.

Installation of the range must be planned so that the rough-in of the junction box for the receptacle or conduit connection will allow maximum clearance to the rear of the unit.

48-Inch, 36-Inch and 30-Inch Dimensions and Clearance Requirements With "Low Back"

NOTE: A 36-inch minimum clearance is required between the top of the cooking surface and the bottom of an unprotected cabinet. A 30-inch clearance can be used when the bottom of the wood or metal cabinet is protected by not less than 1/4 inch of a flame retardant material covered with not less than No. 28 MSG sheet steel, 0.015 inch (0.4 mm) thick stainless steel, 0.024 inch (0.6 mm) aluminum, or 0.020 inch (0.5 mm) thick copper.

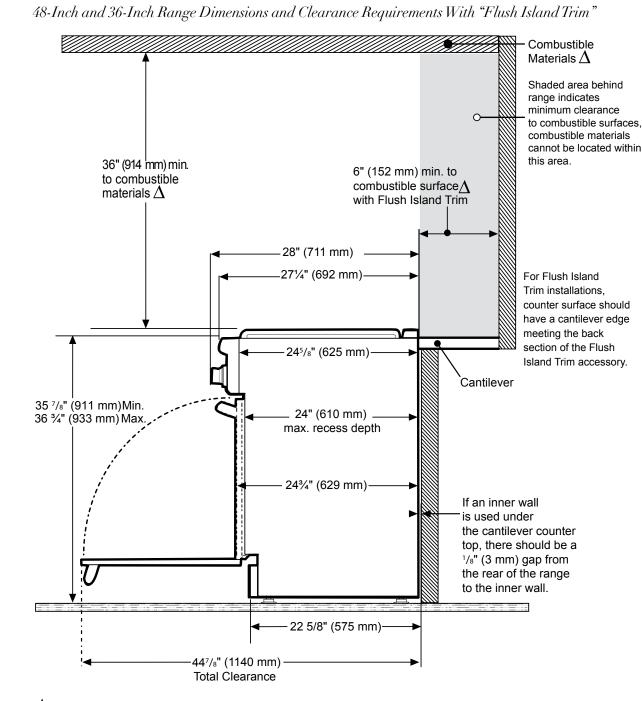

As defined in the "National Fuel Gas Code" (ANSI Z223.1, Current Edition). Clearances from non-combustible materials are not part of the ANSI Z21.1 scope and are not certified by CSA.

48-Inch and 36-Inch: Clearances of less then 6" (152mm) must be approved by the local codes and/or by the local authority having jurisdiction

PRG486WDG 48-INCH GAS PRO GRAND[®] RANGE WITH GRIDDLE PROFESSIONAL SERIES, COMMERCIAL-DEPTH, PORCELAIN COOKTOP SURFACE

FEATURES & BENEFITS

- 🖈 4 ExtraLow® burners for simmering, melting, or holding long durations
- ★ ExtraHigh Star[®] Burner—22,000 BTUs of power for searing or boiling
- 🖈 Hydraulic SoftClose® hinges prevent slamming for ultra smooth closing
- True Convection system directs heat, cooking food faster and evenly
- Superfast 2.5-hour self-clean mode-fastest in the industry

TECHNICAL DETAILS	
Circuit Breaker	20 A
Volts	120 V, 60Hz 3 Wire
Energy Source	Gas
Plug Туре	120V-3 prong
Power Cord Length	65" (1,651 mm)
Gas Supply	3/4"
WARRANTY	
Limited Warranty, Entire Appliance, Parts and Labor	2 Year

SEE PAGE 86 FOR OPTIONAL ACCESSORIES

*Models PCG305xx, PRD305xx, PRD606xx, PRG305xx, PRG305xx, PRG304xx and PRD304xx are suitable for 0" rear clearance to combustible surfaces. All other models: when using the included Island Trim a minimum 6" (152 mm) rear clearance is required to a combustible surface. When installing against a combustible surface, a Thermador® Low Backguard is required for a 0" rear clearance to the combustible surface. A Thermador Low Backguard must be purchased separately. A rear clearance to a surface covered in a noncombustible material (metal, ceramic tile, brick, marble, or stone) is 0" when using the included Island Trim. Clearances of less than 6" (152 mm) should be approved by the local codes and/or by the local authority having jurisdiction. Clearances from non-combustible materials are not part of the ANSI Z21.1 scope and are not certified by CSA.

PRO GRAND[®] PLANNING INFORMATION

Professional Ranges

Model Options

There are three sizes of Thermador Pro Grand Ranges to choose from—60-inch, 48-inch and 36-inch. Models are available in your choice of all-gas or dual-fuel configurations. All models are 27-inches deep and available in stainless steel with a porcelain cooktop surface. Ranges are LP convertible by ordering the specified kit. Be sure to reference the correct model information in this design guide.

Installation Considerations

The information in this design guide provides key features, product dimensions, cutouts and installation specifications. Before installing a Thermador Pro Grand Range, be sure to verify the cutout dimensions and electrical / gas connections. Also, always consult with the installation manual packed with the product for complete details before installing.

Installation Options

Thermador Pro Grand Ranges feature a bold, professional design and a commercial-depth of 27-inches. These ranges can be installed in a wall or island installation.

Ventilation Requirements

We strongly recommend that a Thermador Professional® Wall or Island Hood or Custom Insert be installed with all Thermador Pro Grand Ranges. Reference the selection guide in the ventilation section for compatible Thermador hoods. Downdraft ventilation should not be used. Do not install a microwave-hood combination above the cooktop, as these types of units do not provide the proper ventilation and are not suitable for use with Thermador Pro Grand Ranges.

Important Ventilation Notes:

• For wall installations, the hood width must, at a minimum, equal the nominal width of the appliance cooking surface. Where space permits, a hood larger in width than the cooking surface may be desirable for improved ventilation performance.

- For island installations, the hood width should, at a minimum, overhang the appliance cooking surface by 3" on each side.
- Due to the high heat capability of these cooktops, particular attention should be paid to the hood and duct work installation to assure it meets local building codes.
- For best smoke elimination, the lower edge of the hood should be installed 30" -36" above the appliance cooking surface.
- If the hood contains any combustible materials (i.e., a wood covering), it must be 36" or greater distance above the cooking surface.

Electrical and Gas Specifications

Be sure your appliance is properly installed and grounded by a qualified technician. Installation, electrical and gas connections, and grounding must comply with all applicable local codes.

Natural Gas or LP

Thermador Dual-Fuel Pro Grand Ranges are shipped by the factory to operate on natural gas. They must be converted for use with propane. Verify that the type of gas being used at the installation site matches the type of gas used by the appliance. If the location / job site requires conversion from natural gas to propane (LP), utilize the included LP kit. Field conversion must be done by qualified service personnel only. Please refer to the LP Conversion Instructions for further information.

A manual gas shut-off valve must be installed external to the appliance, in a location accessible from the front, for the purpose of shutting off the gas supply. The supply line must not interfere with the back of the unit.

Natural Gas Requirements:

- Inlet Connection: 3/4" NPT external, 1/2" NPT internal (Minimum 3/4" diam. flex line)
- Supply Pressure: 6" min. to 14" max. water column (14.9 to 34.9 mb)
- Manifold Pressure: 5" water column (12.5 mb)

Propane Gas Requirements:

- Inlet Connection: 3/4" NPT external, 1/2" NPT internal (Minimum 3/4" diam. flex line)
- Supply Pressure: 11" min. to 14" max. water column (27.4 mb to 34.9 mb)
- Manifold Pressure: 10" water column (24.9 mb)

High Altitude:

High altitude kits are available for Thermador Pro Harmony Ranges. Reference the Accessory chart or Contact Customer Support for details.

PRO GRAND[®] PLANNING INFORMATION

Professional Ranges

Dual-Fuel:

Thermador Pro Grand Dual-Fuel Ranges are dual rated, designed to be connected to either 240 / 208V AC, 60 Hz, 4-wire, single-phase power supply. The connection may be made with a range supply cord kit (purchased separately) or by hard-wiring to the power supply. A dedicated circuit breaker is required.

Model	Required Circuit Breaker
	240 / 208V AC, 60Hz
PRD606WCSG	50 A
PRD606WESG	50 A
PRD606WCG	50 A
PRD606WEG	50 A

PRD366WGU	30 A
PRD364WIGU	50 A

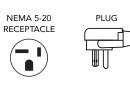

All-Gas:

Thermador Pro Grand All-Gas Ranges are equipped with a 3-wire plug and are designed to be connected to a 120V AC, 60 Hz, single-phase power supply. A dedicated circuit breaker is required.

Model	Required Circuit Breaker
	120V AC, 60 Hz
PRG486WLG	20 A
PRG486WDG	20 A
PRG364WLG	20 A
PRG364WDG	20 A
PRG366WG	15 A

Electrical Supply

IMPORTANT: The cord supplied with gas ranges having an electric griddle requires a NEMA 5-20 receptacle as shown here. Local codes my require a different wiring method.

WARNING: This appliance is equipped with a three-prong grounding plug for protection against shock hazard and should be plugged directly into a properly grounded receptacle. DO NOT cut or remove the grounding prong from this plug. DO NOT ALTER THIS PLUG.

Electrical and Gas Locations

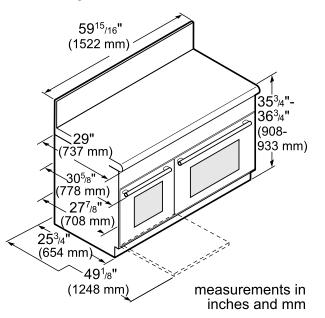

Typical placement of the electrical and gas supply can be found within the "Cutout and Range Dimensions" located on the installation pages. Alternate placement within the supply zone is acceptable. Dual-Fuel ranges may be connected to the power supply with a range supply cord kit (sold separately) or by hard-wiring to the power supply. Allgas ranges may be connected to the power supply with the supplied range cord or by hard-wiring. It is the responsibility of the installer to provide the proper wiring components (cord or conduit and wires) and complete the electrical connection as dictated by local codes and ordinances and/or the National Electric Code. The units must be properly grounded.

Installation of the range must be planned so that the rough-in of the junction box for the receptacle or conduit connection will allow maximum clearance to the rear of the unit.

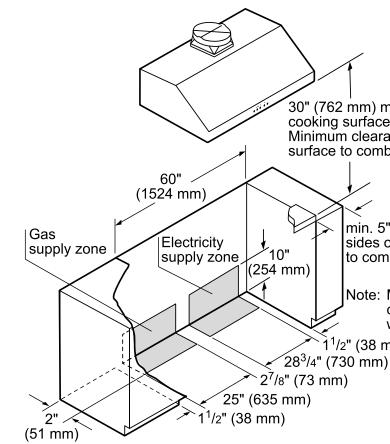

PRO GRAND[®] INSTALLATION

Professional Ranges

30" (762 mm) minimum, clearance from cooking surface to non-combustible surface. Minimum clearance above cooking surface to combustible surface is 36" (914 mm).

min. 5" (127 mm) minimum clearance from sides of the range, above cooking surface, to combustible side walls.

Note: Most hoods contain combustible components that must be considered when planning the installation.

Connect your Thermador appliances to smart devices in your home, such as Amazon Alexa and Google Home.

RANGETOPS

FOR THE PROFESSIONAL COLLECTION

Thermador[®] Rangetops feature an array of innovative new features, such as LED illumination of the control panel knobs, combined with exclusive heritage features, like our patented Pedestal Star® Burner with QuickClean Base®.

RANGETOP

Professional 48-INCH – PCG486WL

PROFESSIONAL RANGETOPS

 $\Phi \cdot \Phi \quad \Phi \cdot \Phi \quad \Phi \cdot \Phi \cdot \Phi$ 48-INCH

★ LED Bullnose Down Lighting

Thoughtfully designed rangetop offers LED lighting to illuminate the control panel.

★ QuickClean Base®

The raised, patented Pedestal Star® Burner and porcelain maintop have been crafted for perfect integration and easy cleanup. A teardrop emboss allows for easier cleanup.

★ExtraLow[®]

Our ExtraLow feature provides a wide range of temperature control. It cycles the patented Pedestal Star® Burner on and off to maintain a very low temperature. Perfect for simmering delicate sauces or keeping food warm without scorching or stirring.

★ Our Exclusive, Patented Pedestal Star® Burner

By creating a perimeter 56% longer than a round burner, the unique star shape allows for more flame ports. The result is a burner that delivers superior flame spread and a reduced cold spot for faster and more even heating.

Star-K Certified

Thermador Professional[®] Rangetops are Star-K certified making it possible to use them on the Sabbath or the holidays.

Fast Time to Boil*

Our patented Pedestal Star[®] Burner provides 18,000 BTU of output on select burners with a superior heat distribution that boils water in a fraction of the time compared to a conventional range or cooktop.

*Available on select burners

A Touch of Bold

Adorn your rangetop with a personal touch. Our cast metallic knobs in signature Thermador Blue are sure to bring an artistic allure to any culinary space.** **Sold separately; see accessories section, page 118

PROFESSIONAL RANGETOPS

Custom Configurations

Configure your rangetop to match the way you cook, by selecting a 12" electric griddle model with an optional grill accessory. Or choose the Pro Indoor Grill model with interchangeable griddle accessory. All are easy to clean and dishwasher safe.

★ 5 Burners, 30-Inch Design, Zero Clearance Delivering the ultimate in luxury performance in a 30" design, the powerful, patented Pedestal Star® Burners fire up to a total of 59,000 BTUs yet only require 300 CFM venting. Thanks to an innovative technology this allows for a flush installation against a kitchen wall with zero clearance for complete design flexibility.

🖈 Pro Indoor Grill

Easy-to-clean, indoor grilling feature boasts industry-leading design, featuring ceramic briquettes and fusion coated grill that fully cover the heating elements to offer exceptional grilling performance with genuine smoky flavor while minimizing flare-ups. Two heating zones let you control the front and back zones independently.

18,000 BTU on Every Front Burner and 15,000 BTU on Every Back Burner*

Delivers superior cooking flexibility by offering maximum heat output on every burner. *Except model PCG305W

PCG486WD **48-INCH GAS RANGETOP WITH GRIDDLE** PROFESSIONAL SERIES, PORCELAIN COOKTOP SURFACE

FEATURES & BENEFITS

- ★- Patented Pedestal Star[®] Burner with QuickClean Base[®] designed for easy surface cleaning and superior heat spread for any size pan
- ★- Precision simmering capabilities as low as 100°F (375 BTU) with 2 ExtraLow[®] Simmer burners
- ★- LED Downlighting—hidden discreetly above the control panel provides functional and stylish illumination
- Superior griddle results—6 pass, 1,630 Watt thermostatically controlled griddle
- Non-stick, rust-proof cast-aluminum griddle, removable for easy cleanup

Thermador

PLANNING INFORMATION

Professional Rangetops

Model Options

There are three sizes of Thermador Professional® Rangetops to choose from — 30-inch, 36-inch and 48-inch. Models are available with various rangetop configurations. Each model ships standard with an Island Trim. Every model is LP convertible by ordering a conversion kit. Be sure to reference the correct model information in this design guide.

Installation Considerations

The information in this design guide provides key features, product dimensions, cutouts and installation specifications. Before installing a Thermador Professional Rangetop, be sure to verify the cutout dimensions and electrical / gas connections. Also, always consult with the installation manual packed with the product for complete details before installing.

Installation Options

To ensure professional results, the cabinet and countertop openings should be prepared by a qualified cabinet worker. The rangetop can be installed in various positions with the front either flush or projecting, depending on the countertop's depth. The rangetop is designed to hang from the countertop by its side flanges. The countertop however, must be strong enough to support the rangetop. It may be necessary to add a supporting cleat along each side or a 2" x 4" corner brace. Another alternative would be to construct a deck to set the rangetop on. Consult with the installation manual packed with the product for complete details before installing.

Above a Warming Drawer

Thermador Professional Rangetops may be installed above a Thermador Warming Drawer to create a convenient cooking center. A minimum 2 3/4" (70 mm) clearance is required between the bottom of the rangetop and the top of the warming drawer. Refer to the warming drawer section for additional specifications.

Rear Clearance Requirements

30-Inch model PCG305W is suitable for 0" rear clearance to combustible surfaces.

All other models must meet these clearances:

When using the included Island Trim, Thermador recommends a minimum 6" (152 mm) rear clearance to a combustible surface. Clearances of less than 6" must be approved by the local codes and / or by the local authority having jurisdiction.

A rear clearance to a surface covered in a noncombustible material* is 0" when using the included Island Trim.

When installing against a combustible surface, a Thermador Low Backguard (purchased separately) is required for a 0" rear clearance to the combustible surface.

Electrical and Gas Specifications

Be sure your appliance is properly installed and grounded by a qualified technician. Installation, electrical and gas connections, and grounding must comply with all applicable local codes.

Thermador Professional[®] Rangetops are equipped with a 3-wire plug and are designed to be connected to a 120V AC, 60 Hz, single-phase power supply. A dedicated circuit breaker is required.

Model

Required Circuit Breaker

	120V AC, 60Hz
PCG486WD	20 A
PCG486WL	20 A
PCG364WD	20 A
PCG364WL	20 A
PCG366W	15 A
PCG305W	15 A

Electrical Supply

The cord supplied with the gas ranges having an electric griddle or grill requires a NEMA 5-20 receptacle. All other gas units require a NEMA 5-15 receptacle.

G

Gas Requirements and Hookup

Rangetops are shipped by the factory to operate on natural gas. They must be converted for use with propane. Verify that the type of gas being used at the installation site matches the type of gas used by the appliance. If the location / job site requires conversion from natural gas to propane (LP), order an LP kit. Field conversion must be done by qualified service personnel only. Please refer to the LP Conversion Instructions for further information.

Natural Gas Requirements:

- Inlet Connection: 1/2" NPT internal (Minimum 3/4" dia. flex line)
- Supply Pressure: 6" min. to 14" max. water column (14.9 to 34.9 mb)
- Manifold Pressure: 5" water column (12.5 mb)

Propane Gas Requirements:

- Inlet Connection: 1/2" NPT internal (Minimum 3/4" dia. flex line)
- Supply Pressure: 11" min. to 14" max. water column (27.4 mb to 34.9 mb)
- Manifold Pressure: 10" water column (24.9 mb)

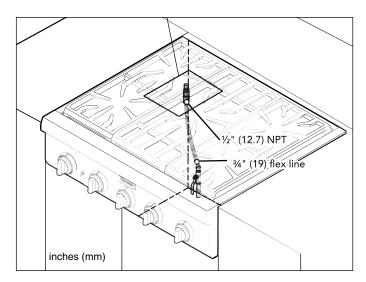

A manual gas shut-off valve must be installed external to the appliance, in a location accessible from the front, for the purpose of shutting off the gas supply. The supply line must not interfere with the back of the unit.

PLANNING INFORMATION

Professional Rangetops

Gas Inlet Location

	30-Inch	36-Inch	48-Inch
From left side to centerline	6 3/8 "	11"	
of gas inlet	(152 mm)	(267 mm)	
From rear to centerline of	2 1/4"		
gas inlet		(54 mm)	

Ventilation Requirements

We strongly recommend that a Thermador Professional Wall Hood, Island Hood or Custom Insert be installed with all Thermador Professional Rangetops. Due to the high heat capability of these units, particular attention should be paid to the hood and duct work installation to assure it meets local building codes.

Downdraft ventilation should not be used. Due to the high heat of the Rangetop burners, installing a microwave oven with a ventilation system over the rangetop is not recommended on anything other than the 30" 5-Burner. Refer to OTR manufacturer's installation manual for clearances.

The following table indicates the ventilation hood options for use with Thermador Professional Rangetops. Refer to the Ventilation Selection Guide in the Ventilation section or www.Thermador.com for a complete selection of ventilation options, blowers, and accessories.

Width	Configuration	Ventilation Options
48"	6 Burners with Griddle	48" or 54" Pro Wall Hood
	and 6 Burners with	48" Chimney Wall Hood
	Pro Grill	54" Island Hood
		48" or 54" Custom Insert
36"	4 Burners with Griddle,	36" or 42" Pro Wall Hood
	4 Burners with Pro Grill	36" Chimney Wall Hood
	and 6 Burners	42" Island Hood
		36" or 42" Custom Insert
30"	5 Burners	30" or 36" Pro Wall Hood
		30" or 36" Chimney Wall Hood
		30" or 36" Drawer Hood
		36" or 42" Island Hood
		30" or 36" Custom Insert

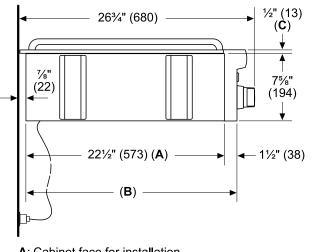

Important Ventilation Notes:

- For wall installations, the hood width must, at a minimum, equal the width of the Rangetop. Where space permits, a hood larger in width than the Rangetop may be desirable for improved ventilation performance.
- For island installations, the hood width should overhang the width of the Rangetop by a minimum of 3" (76 mm) on each side.
- For best smoke elimination, the lower edge of the hood should be installed 30" (762 mm) above the range cooking surface.
- If the hood contains any combustible materials (i.e. a wood covering), it must be installed a minimum of 36" (914 mm) above the cooking surface.
- Due to the high volume of ventilation air, a source of outside replacement air is recommended. This is particularly important for tightly sealed and insulated homes.
- A qualified heating and ventilating contractor should be consulted.

INSTALLATION

Professional Rangetops

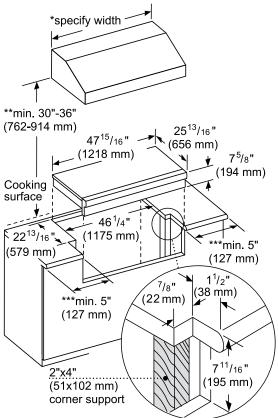

48" RANGETOP SIDE VIEW

A: Cabinet face for installation with projecting control panel.
B: Cabinet face for installation with flush control panel.
C: Side flange

48-INCH RANGETOP CUTOUT DIMENSIONS

* Minimum recommended hood width equals that of the range or cooktop.

** 36" minimum clearance from cooking surface to combustible surfaces.
*** 5" minimum clearance from cooking surface

*** 5" minimum clearance from cooking surface to combustible side wall.

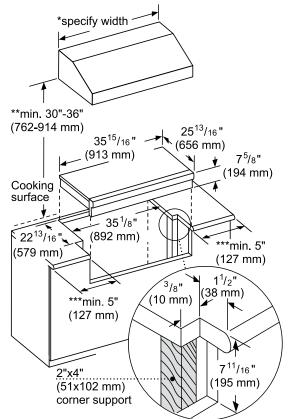

Note: Most hoods contain combustible components that must be considered when planning the installation.

INSTALLATION

Professional Rangetops

36-INCH RANGETOP CUTOUT DIMENSIONS

- ** 36" minimum clearance from cooking surface to combustible surfaces.
- *** 5" minimum clearance from cooking surface to combustible side wall.

Note: Most hoods contain combustible components that must be considered when planning the installation.

measurements in inches (mm)

INSTALLATION

Professional Rangetops

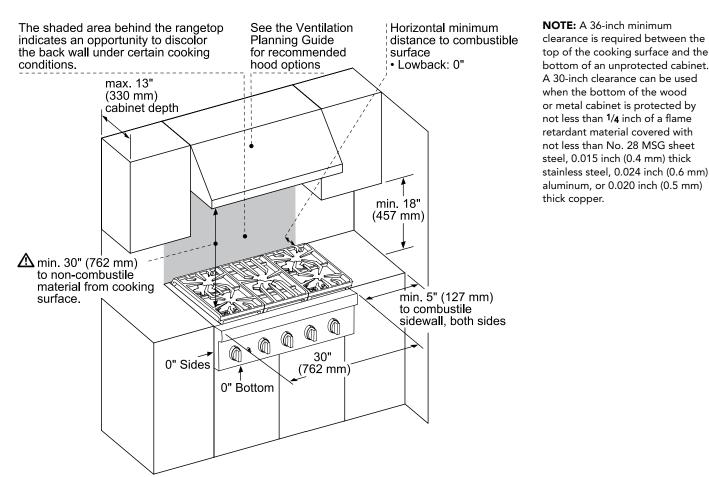

48-Inch And 36-Inch Rangetop Clearances

As defined in the "National Fuel Gas Code" (ANSI Z223.1, Current Edition). Clearances from noncombustible materials are not part of the ANSI Z21.1 scope and are not certified by CSA. Clearances must be approved by the local codes and/or by the local authority having jurisdiction. **NOTE:** A 36-inch minimum clearance is required between the top of the cooking surface and the bottom of an unprotected cabinet. A 30-inch clearance can be used when the bottom of the wood or metal cabinet is protected by not less than 1/4 inch of a flame retardant material covered with not less than No. 28 MSG sheet steel, 0.015 inch (0.4 mm) thick stainless steel, 0.024 inch (0.6 mm) aluminum, or 0.020 inch (0.5 mm) thick copper.

INSTALLATION Professional Rangetops

30-INCH RANGETOP INSTALLATION WITH HOOD

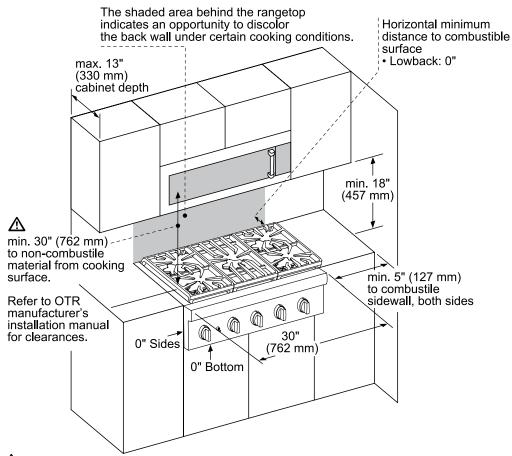

As defined in the "National Fuel Gas Code" (ANSI Z223.1, Current Edition). Clearances from non-combustible materials are not part of the ANSI Z21.1 scope and are not certified by CSA. Clearances must be approved by the local codes and/or by the local authority having jurisdiction.

measurements in inches (mm)

INSTALLATION

Professional Rangetops

30-INCH RANGETOP INSTALLATION WITH OVER-THE-RANGE MICROWAVE

As defined in the "National Fuel Gas Code" (ANSI Z223.1, Current Edition). Clearances from non-combustible materials are not part of the ANSI Z21.1 scope and are not certified by CSA. Clearances must be approved by the local codes and/or by the local authority having jurisdiction.

NOTE: See the Ventilation Planning Guide for recommended hood options. Due to the high heat of the burners, installing a microwave oven with a ventilation system over the appliance is not recommended on anything other than the 30'' 5-Burner. Refer to the OTR manufacturer's installation manual for clearances.

Spotlight Feature

Thermador Ovens are available with Left and Right Side Opening doors to maximize design options.

Built-in

BUILTHN OVENS

THERMADOR

FOR MASTERPIECE[®] & PROFESSIONAL COLLECTIONS

Updated with vibrant color displays, stunning metallic gray glass, and luxurious stainless steel, the redesigned Thermador Collections are available in two bold styles: Masterpiece with contemporary handles for a sleek, modern look, and Professional with bold handles and rotating knobs.

RIGHT SIDE OPENING DOOR BUILT-IN OVEN

Professional 30-INCH – POD301RW

FEATURES

BUILT-INOVENS SELECT FEATURES

СОМВО

★ Maxbroil®

The Thermador exclusive 4,800 Watt, 12-pass broil element enables you to broil even large dishes more evenly.

★ Heavy-Duty Rotisserie

Heavy-duty, removable rotisserie, cooks up to 12-pound roasts and poultry evenly on all sides. Following your meal, simply place the rotisserie in the dishwasher.

★ SoftClose[®] Door

SoftClose hinges prevent slamming and ensure ultra smooth closing of the oven door.

16 Cooking Modes

Select Convection Ovens come with 16 cooking modes, including Dehydrate, Slow Roast, and Rotisserie. Select your mode with a glass touch-control panel or elegant stainless steel knobs.

Multi-Point Temperature Probe

The multi-point temperature probe utilizes multiple cooking points for added precision and consistency.

3 Telescopic Racks

Select models offer 3 Full Access® telescopic racks that glide smoothly and safely to support heavier dishes, while integrated, easy-grip handles make them simple to use.

Side Opening Door

Masterpiece® and Professional wall ovens offer both Left and Right Side Opening Doors on select models, providing more options for your kitchen design.

FEATURES

BUILT-INOVENS

★ Thermador[®] Connected Experience

Thermador Connected Experience by Home Connect™ enables you to explore further and push your culinary limits. Features including Remote Start and mobile notifications that let you know when your food is hot and ready to enjoy, as well as provide recipe integration and pairing suggestions.

Large Capacity

Offering a capacity of 4.5 cubic feet of cooking space, 30" Thermador Professional and Masterpiece® Ovens are one of the largest in their class*, capable of handling dinner parties large and small. *According to AHAM Standards

Speed Convection

No preheat needed. Reduce cooking times for frozen foods with the Speed Convection system from Thermador®, providing even cooking in less time.

True Convection

Thoughtfully engineered and flawlessly executed, the True Convection baffle system allows hot air to flow evenly throughout the oven without flavor transfer.

Softlight

Halogen theater lighting dims on and off each time you open and close the oven door, bringing light to your culinary masterpiece.

Super Fast Pre-Heat

Available for Bake, Convection Bake, Roast, Convection Roast and True Convection modes, Super Fast Pre-heat is the perfect solution when you are time starved.

Self-Clean

Self-clean mode cleans interior walls and rack supports in as little as 2 hours.

Star-K Certified

Thermador Built-In Ovens are Star-K certified making it possible to use them on the Sabbath or the holidays.

Standard or Flush Installation

Thermador built-in ovens feature gray glass on stainless steel for a luxurious finish, with options for standard or flush installation.

BUILT-IN OVENS THERMADOR

★ Thermador[®] Exclusive

STEAM OVENS

BUILT-IN OVENS

Cook More with Steam

Thermador Steam Ovens feature the largest 30" steam capacity on the market*, with multiple racks to accommodate your all of your culinary ambition. *According to AHAM Standards

True Convection

Thoughtfully engineered and flawlessly executed, the True Convection baffle system allows hot air to flow evenly throughout the oven without flavor transfer.

Broil Element

From succulent steaks to flawless au gratin, the broiling element offers more ways to perfect and complete your favorite recipes.

Exceptional Taste without Flavor Transfer

Thermador steam ovens produce dishes to enhance texture, appearance, and of course, taste. Cook multiple dishes at once with no flavor transfer, so you can plan different courses at the same time.

Enhanced Flavors

Cooking with steam ovens helps food retain vitamins and minerals, and can eliminate the need to add unhealthy fats and oils.

17 Heating Modes

With 17 additional cooking modes, including roast, convection broil, defrost, and reheat, Thermador steam ovens open a whole new door to culinary possibilities.

SPEED OVENS

BUILT-IN OVENS

Cook at Full Speed

Thermador Speed Ovens combine convection baking, broiling and microwaving into one powerful, ultra-convenient unit. With 10 power levels and a 1.6 cubic foot capacity, Speed Ovens can heat and reheat prepared meals from Margherita pizza to fluffy breads, with a crisp finish.

Convection Bake & Broil

Enjoy the convenience of a microwave with the added ability to convection bake and broil.

CookSmart®

36 CookSmart Auto Programs include convection, high and low broil, and ability to warm, cook frozen foods, and microwave for a variety of deliciously creative dishes.

Exceptional Design

Choose from 30" Masterpiece® or Professional designs, with options for standard or flush installation.

Spotlight Feature

Think beyond fish and vegetables use your Thermador Steam Oven for homemade bread, as well as ability to cook a 14 pound turkey in 90 minutes.

MC30WS

MASTERPIECE® SERIES

30-INCH SPEED OVEN

FEATURES & BENEFITS

- A microwave and a convection oven for a variety of cooking options including convection bake and broil.
- 36 CookSmart[®] automatic cooking programs offer faster cooking times for your convenience
- 10 levels of microwaveable power with a kitchen timer and panel lock setting
- Specially crafted gray glass on stainless steel for a luxurious look and finish
- Designed for flexibility—standard or flush installation into kitchen cabinets

To be fully ADA compliant, these units must be installed according to ADA guidelines. Please check current ADA requirements for guidance on installation.

PLANNING INFORMATION

Built-In Ovens

Model Options

There are two Thermador Built-in Oven collections to choose from— Professional and Masterpiece®. Each collection features a distinctive style. Be sure to reference the correct model information in this design guide.

Installation Considerations

The information in this design guide provides key features, product dimensions, cutouts and installation specifications. Before installing a Thermador Oven, be sure to verify the cabinet dimensions and electrical connections. Also, always consult with the installation manual packed with the product for complete details before installing.

Important

When a Thermador Oven is installed at the end of a cabinet run, adjacent to a perpendicular wall or cabinet door, it is good practice to allow at least 1/4" (6.4 mm) space between the side of the oven and the wall or door.

When installing a side hinge oven, leave a minimum 10" (254 mm) clearance to allow the door to open.

For oven support, install 2 x 4's extending front to back flush with the bottom and the side of the opening. The supporting base must be well secured to the floor / cabinet, flat / level and capable of supporting at least the weights listed in the chart below.

Minimum Cabinet Base Support Weights

Single Ovens	232 lbs (105 kg)
Steam and Convection Ovens	232 lbs. (105 kg)
Speed Ovens	142 lbs. (64.1 kg)
Double Ovens	429 lbs. (195 kg)
Double Combination Ovens with Steam and Convection Oven	429 lbs. (195 kg)
Double Combination Oven with Microwave or Speed Oven	322 lbs. (146 kg)
Triple Combination Oven with Speed Oven and Warming Drawer	429 lbs. (195 kg)

Electrical Location

Refer to the appropriate installation diagram for details on conduit box location.

Electrical Specifications

Be sure your appliance is properly installed and grounded by a qualified technician. Installation, electrical connections and grounding must comply with all applicable local codes.

All built-in ovens below are dual rated, designed to be connected to either 240V / 208V AC, 60 Hz, 4-wire, single-phase power supply. Install a suitable conduit box (not furnished). An appropriately-sized, UL-listed conduit connector must be used to correctly attach the conduit to the junction box.

Required Circuit Breaker 208/240V

Single Ovens	30 Amp
Steam and Convection Ovens	20 Amp
Speed Ovens	16 Amp
Double Ovens	40 Amp
Double Combination Ovens with Steam and Convection Oven	40 / 50 Amp
Double Combination Oven with Microwave or Speed Oven	40 / 50 Amp
Triple Combination Oven with Speed Oven and Warming Drawer	40 / 50 Amp

Important

Local Codes may vary; installation, electrical connections and grounding must comply with all applicable local codes.

If local codes permit grounding through the electrical supply neutral, connect both the white neutral wire and the bare ground wire from the oven to the white neutral electrical supply wire.

MICROWAVES

BUILT-IN MICROWAVES MICRODRAWER[®]

★ Large Capacity

Our Built-In MicroDrawer® Microwave features a 1.2 cubic foot capacity. The drawer is tall enough to hold a 20 oz. cup and large enough to contain a 9" by 13" casserole dish.

★ Flush Installation

The Built-In MicroDrawer[®] Microwave can be installed perfectly flush in any standard depth cabinetry while providing superior access and ease of use, with the appliance placed at a convenient height.

★ Sensor Cooking

Auto cooking modes, including melt, warm and soften, help achieve perfect results. Our Built-In MicroDrawer® Microwave also includes a special sensor mode that detects moisture and automatically adjusts cooking level and time to take the guesswork out of cooking and reheating.

Touch "Open" and "Close"

Incorporating a sleek, uncluttered design, the Built-In MicroDrawer[®] Microwave opens and closes with a simple touch, eliminating the need for a handle.

BUILT-INMICROWAVES DROP-DOWNDOOR

Sensor Cooking

The microwave oven measures humidity to achieve perfect results with minimal user programming.

10 Power Levels

When microwaving, enjoy the ultimate in control and flexibility for perfect results every time.

Keep Warm

Keep food warm for more than 30 minutes after cooking.

Auto Defrost

Defrost foods such as meat, poultry and seafood simply by choosing the food type and entering the weight.

Design

Seamlessly blend in your microwave oven with your wall ovens. Drop-down doors allow for a sleek in-line execution, without the need for a trim kit.

PLANNING INFORMATION

Built-In Microwaves

Model Options

Several Thermador microwaves are available to meet a wide variety of installations. Choose a Thermador 24-inch or 30-inch Built-in MicroDrawer® Microwave which is the only drawer microwave that can be installed perfectly flush in any standard depth cabinetry. A Builtin Microwave with a drop-down door is available with a Professional or Masterpiece® handle. A Built-Under Microwave Hood is also available for select installations. Be sure to reference the correct model information in this design guide.

Installation Considerations

The information in this design guide provides key features, product dimensions, cutouts and installation specifications. Before installing a Thermador Microwave oven, be sure to verify the cabinet dimensions and electrical connections. Also, always consult the installation manual packed with the product for complete details before installing.

It is the responsibility of the owner and the installer to determine if additional requirements and/or standards apply to specific installations.

Installation Options

Microdrawer* Microwave

The Thermador MicroDrawer® Microwave can be built into a cabinet or wall as a standalone unit or under a Thermador Built-in Oven.

Check to be sure that there is a clearance of 2" or greater between the top of the MicroDrawer[®] Microwave and the bottom of a built-in wall oven above it.

Built-In Microwaves With Drop-Down Door

Thermador Built-in Microwaves may be installed into a cabinet or wall as a standalone unit or above any Thermador Built-in Oven. They may also be installed above any Thermador Warming Drawer.

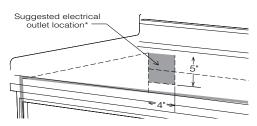

Electrical Specifications

These units require a 120 volt, 60 Hz, 15 AMP (minimum) circuit. It is recommended that the unit be installed to a separate circuit that serves only this appliance.

These appliances are fitted with a 3-prong grounded electrical plug. Do not modify the plug or use an adapter. If the plug does not fit with the available receptacle, have a licensed electrician install a properly grounded outlet before proceeding with the installation.

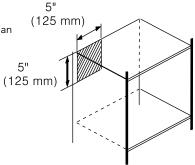

Model	Required Circuit Breaker		
	240V, 60 Hz		
MD30WS	15 A		
MD24WS	15 A		
MB30WP	15 A		
MB30WS	15 A		
MU30WSU	15 A		

Electrical Location – Microdrawer® Microwaves

Unit can also be installed using an electrical outlet in an adjacent cabinet within the area where the provided electrical cord can reach. Do not use an extension cord.

If the power supply cord is too short, have a qualified electrician or serviceman install an outlet near the appliance.

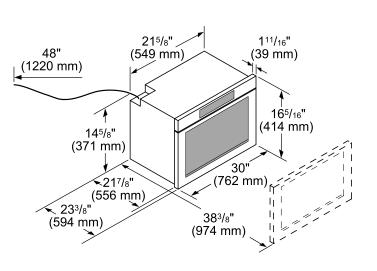

Electrical Location – Built-In Microwaves with Drop-Down Door

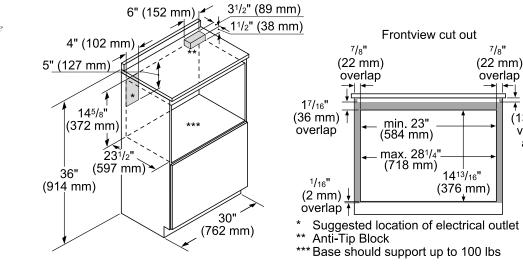

Anywhere within the shaded area the minimal distance between the appliance and the wall is $1\frac{3}{4}$ in (45 mm). The outlet can be located anywhere within the shaded area.

WARMING & STORAGE DRAWERS

Warming Drawers

SoftClose® Drawer

SoftClose doors prevent slamming and ensure ultra smooth closing of the Warming Drawer. (Available on custom panel models only)

Touch Control

This convenient feature boasts a digital display to easily activate and monitor any one of the 4 temperature settings. It also includes an electronic timer, a hot-surface indicator, and an automatic shut-off feature.

Telescopic Rails

These rails feature a telescoping ball-bearing design for smooth opening and closing. (Available on custom panel models only)

EasyAccess

The open sides make it easier and more convenient to load and remove plates from the spacious drawer cavity.

Easy Custom Panel Installation

Our custom panel ready model lets you create a custom panel to match the warming drawer to existing cabinetry. The fully flush-mounted design lets you achieve a seamless appearance. Together, these features offer the ultimate in design flexibility.

Storage Drawers

Storage Drawer

Keep important items within reach in the convenient storage drawer, the perfect complement to your Thermador built-in wall oven or coffee machine, available in two height options.

SD30WC **30-INCH STORAGE DRAWER** PUSH TO OPEN

SDS30WC **30-INCH STORAGE DRAWER, SHORT** PUSH TO OPEN

FEATURES & BENEFITS

- Our storage drawer is the perfect combination of uncompromising performance, unique convenience features and elegant design
- Designed to store your plates, trays, and accessories in the kitchen
- Storage drawer pairs beautifully with the Thermador speed, steam or wall oven
- The rails feature a telescoping ball-bearing design for smooth opening and closing that supports up to a 40 lbs. load
- Matches Thermador Built-in Products. Install either flush or fully overlay.

PLANNING INFORMATION

Warming & Storage Drawers

Model Options

Thermador 30-inch Warming Drawers are available in a push-to-open design with a stainless front or a Custom Panel design. These drawers pair beautifully with a Thermador speed oven or microwave. Thermador 30-inch Storage Drawers are available in a standard or short design. The short design pairs perfectly with a Thermador steam and convection oven. Be sure to reference the correct model information in this design quide

Installation Considerations

The information in this design guide provides key features, product dimensions, cutouts and installation specifications. Before installing a Thermador Warming Drawer or Storage Drawer, be sure to verify the cabinet dimensions and electrical connections (if required). Also, always consult with the installation manual packed with the product for complete details before installing.

Electrical Specifications

Be sure your appliance is properly installed and grounded by a qualified technician. Installation, electrical connections and grounding must comply with all applicable local codes.

All Thermador Warming Drawers are designed to be connected to a 120V AC, 60 Hz, 3-wire, grounded outlet with a 15 A circuit breaker.

Electrical Location

The outlet can be installed in the back wall directly behind the drawer. A recessed power receptacle must not exceed 5 1/2 ft. (1.7 m) maximum distance from either side of the warming drawer cutout. Installation clearances permit for the excess power cord to be coiled behind the appliance.

Installation Options

Wall-Mounted Installation

Thermador Warming Drawers may be installed below any Thermador Single or Double Built-in Oven. A minimum space of 1" (25.4 mm) is recommended between the bottom of the oven and the top of the warming drawer.

Under-Counter Installation

Thermador Warming Drawers may also be installed below any Thermador Electric or Non-professional Gas Cooktop as long as there is not contact between the bottom of the cooktop and the top of the warming drawer. When installing below a Thermador

Induction Cooktop, a minimum 1" (25.4 mm) air gap must be maintained between the bottom of the cooktop and the top of the warming drawer. When installing below a Thermador Professional Rangetop, a minimum 2 3/4" (70 mm) air gap must be maintained between the bottom of the rangetop and the top of the warming drawer

The cabinet base must be flat and capable of supporting a weight of at least 110 lbs. (50 kg).

Custom Front Panel

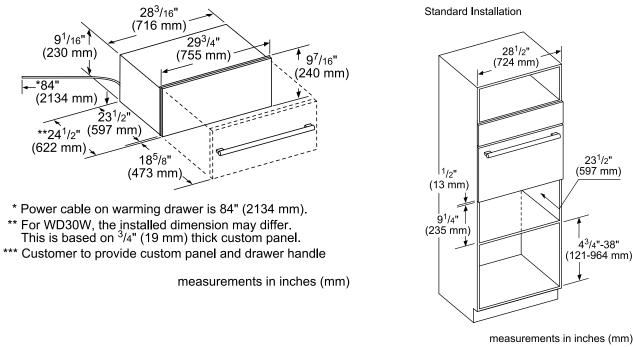

The Thermador Custom Panel Warming Drawer requires a custom front panel. You may build a custom drawer front panel to coordinate with your cabinetry. Custom panels must meet the following requirements:

- Have a handle
- Have the dimensions shown below
- Have a minimum thickness of 3/4" (19 mm)
- Have all edges finished
- If using wood, the back must be sealed to prevent moisture damage
- Be capable of withstanding a temperature of 158°F (70° C)

GAS

COOKTOPS

Redesigned with stunning contemporary grates, the latest iteration of Thermador Gas Cooktops offers our patented Pedestal Star[®] Burners and ExtraLow[®] Select.

30-INCH

★ Patented Pedestal Star[®] Burner and QuickClean Base®

So unique, it belongs on a pedestal, our patented Pedestal Star[®] Burner is paired with a QuickClean Base[®] for easy cleanup.

★*ExtraLow*[®]*Select*

Perfect your delicate sauces with Thermador ExtraLow Select. Offering an unbeatably wide temperature range with simmer settings as low as 204 BTU's, the feature provides five distinct simmer settings for consistency every time—plus our signature blue light.

***** Illuminated Control Panel with Metal Knobs Signature metal knobs within a glass control design panel feature blue progressive illumination that adjusts to indicate the burner setting.

Up to 18,000 BTUs

The center burner offers up to 18,000 BTUs of power, delivering high heat that boils water faster and helps you achieve perfect searing.

Star-K Sabbath Compliant

Thermador gas cooktops are Star-K Sabbath Compliant.

SGS365TS **36-INCH GAS COOKTOP** MASTERPIECE[®] STAR[®] BURNER SERIES

FEATURES & BENEFITS

- ★ Patented Star[®] Burner's unique five-point design offers more ports and more flame distribution that a round burner
- Powerful 16,000 BTU center burner for rapid boiling and high heat searing
- Continuous grates allow pots and pans to move effortlessly across the cooktop
- Electronic re-ignition will automatically re-ignite the burner in case the flame goes out
- Sealed burners prevent spills from entering the burner box

ACCESSORIES (OPTIONAL)

SWOKRINGW Wok Ring

SGRIDDLEW Griddle

SLPKITW LP Conversion Kit

PLANNING INFORMATION

Gas Cooktops

Model Options

There are two sizes of Thermador Masterpiece® Gas Cooktops to choose from—30-inch and 36-inch. Every model is LP convertible by ordering a conversion kit. Be sure to reference the correct model information in this design guide.

Installation Considerations

The information in this design guide provides key features, product dimensions, cutouts and installation specifications. Before installing a Thermador Masterpiece® Gas Cooktop, be sure to verify the cutout dimensions and electrical / gas connections. Also, always consult with the installation manual packed with the product for complete details before installing.

Thermador Masterpiece® Gas Cooktops may be installed above a Thermador Oven, as long as the minimum distance between the cabinet floor and countertop is maintained. Reference the installation pages in this guide for details on installing above a conventional oven, steam oven, and microwave / speed oven.

Thermador Masterpiece® Gas Cooktops may also be installed above a Thermador Warming Drawer to create a convenient cooking center. Refer to the warming drawer section for additional specifications.

Prepare The Countertop

Some solid surface countertops require a special cutout size and special installation. For example, heat reflective tape or rounded corners may be necessary. Contact the countertop manufacturer for instructions specific to your countertop.

Ventilation Requirements

We strongly recommend that a Thermador Ventilation Hood be installed with all Thermador Masterpiece® Gas Cooktops. The hood must be installed according to instructions furnished with the hood. Refer to the ventilation section or www.Thermador.com for a complete selection of ventilation options, blowers, and accessories.

When installing the gas cooktop with a downdraft ventilation system, make sure that a minimum 27 square inch (174 cm²) opening is provided in the toe-kick and cabinet base for adequate air inlet.

A cooktop sealing kit must also be purchased and installed. Refer to the downdraft ventilation section for more details.

Electrical and Gas Specifications

Be sure your appliance is properly installed and grounded by a qualified technician. Installation, electrical and gas connections, and grounding must comply with all applicable local codes. Thermador Masterpiece® Gas Cooktops are equipped with a 60-inch, 3-wire supply cord and require a 60 Hz, 15 Amp, 120 VAC connection.

IMPORTANT: It is required that the cooktop be installed on a grounded, non-GFCI branch circuit.

Thermador Masterpiece® Gas Cooktops are shipped by the factory to operate on natural gas. They must be converted for use with propane. Verify the type of gas being used at the installation site matches the type of gas used by the appliance. If the location / job site requires conversion from natural gas to propane (LP), order the appropriate kit by referencing the model specification page in this guide. Field conversion must be done by qualified service personnel only. Please refer to the LP Conversion Instructions for further information.

Supply Pressure Requirements:

NATURAL GAS – 7 inches water column (14.9 Millibars) minimum.

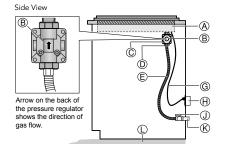

LP (PROPANE GAS) – 11 inches water column (27.4 Millibars) minimum.

NOTE: The propane gas tank must be equipped with its own high pressure regulator in addition to the pressure regulator supplied with this unit.

Electrical and Gas Locations

The opening for the gas connection and electrical cord is located at the right rear of rough-in box.

Plan the installation so that the power connection is accessible from the front of the cabinet. Install a manual gas shut-off valve near the appliance. It must be easily accessible in an emergency.

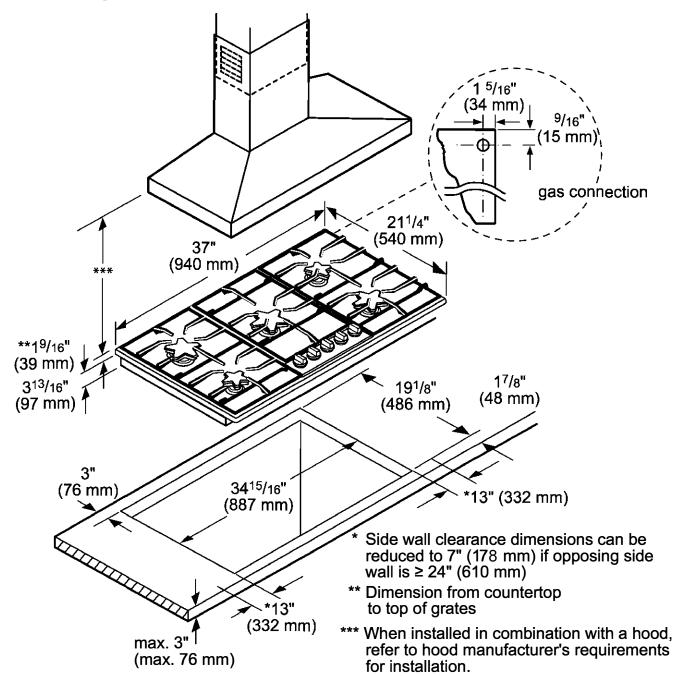

- **A** Rough-in Cooktop Box
- **B** Arrow on Pressure Regulator
- **C** Pressure Regulator
- **D** 1/2" Female Pipe Threads
- **E** Flexible Gas Line
- **G** Power Cord (60 inches /

measurements in inches (mm)

INSTALLATION

Gas Cooktops

30-Inch Cooktop and Cutout Dimensions

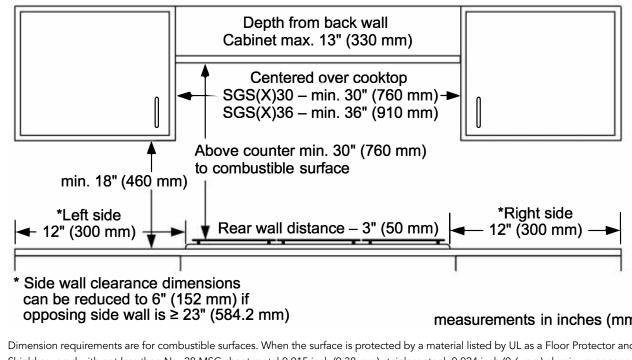

measurements in inches (mm)

INSTALLATION

Gas Cooktops

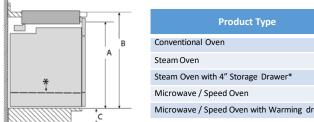

Dimension requirements are for combustible surfaces. When the surface is protected by a material listed by UL as a Floor Protector and Wall Shield covered with not less than No. 28 MSG sheet metal 0.015 inch (0.38 mm) stainless steel, 0.024 inch (0.6 mm) aluminum or copper, it is considered noncombustible and some dimensions may be reduced. For a noncombustible surface over the cooktop, the minimum clearance is 24" (61 cm) rather than 30" (76 cm).

WARNING: To reduce the risk of ignition of nearby combustible materials, install the countertop with a minimum distance of 13" (33 cm) from side walls and 3" (8 cm) from back wall.)

NOTE: All measurements given have to be precisely followed. If nonstandard cabinets are used, make sure they are installed with minimum dimensions shown.

Plan the installation of the unit so that the power cord, gas shut-off valve and gas pressure regulator are accessible from the front of cabinet.

30-Inch & 36-Inch Gas Cooktop Installation Above a Thermador Built-In Oven

When installing an oven or oven with a drawer in combination with a cooktop, a minimum distance between the cabinet floor and countertop (B) is required. Reference the table for dimensions. Refer to the oven installation guide for all other measurements.

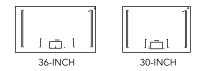

measurements in inches (mm)

	A Inches (mm)	B min. Inches (mm)	C max. Inches (mm)

FREEDOM® INDUCTION

COOKTOPS

Enjoy unparalleled freedom of movement with the cooktop that automatically detects the presence of your cookware, and transfers all programmed settings to the next location whenever it's shifted.

★ Largest Usable Cooking Surface

Featuring the largest fully usable cooking surface area on the market within its class—26% larger than the nearest competitor—the 36" Freedom Induction cooking surface boasts 56 induction elements, allowing you to heat up to 6 pots anywhere on the cooktop.

★ Freedom[®] TeppanyakiPro[®]

Divide your teppanyaki grill into one heated and one nonheated area, so you can quickly move ingredients on and off of the heat. Smart technology recognizes the shape of the teppanyaki grill and only delivers induction power to one side, making it easy to cook everything from fried rice to yakisoba.

★ Freedom[®] Sapphire Glow[®]

Complement your cooking with a guiding light that follows the position of your cookware on the induction surface. Unique to Thermador, Freedom Sapphire Glow is a light feature that delivers beyond aesthetics, with visual feedback when a pot is moved or heated.

★ Freedom[®] MyZone[®]

Allowing you to change a preset power level simply by moving a pot or pan on the cooktop, this setting is perfect for challenging recipes that require frequent temperature changes.

★ Thermador[®] Connected Experience: Freedom[®] Cooktop-Hood Sync

Communication is key—so the Freedom Induction cooktop and matching ventilation hood have been designed to do just that. The cooktop and matching hood can communicate with one another to synchronize turning on task lighting and ventilation.

Enhanced, Full Color Touchscreen

Featuring clear, vibrant displays, the 6.5" panel provides fast access to each cooking mode.

LIBERTY[®] INDUCTION

COOKTOPS

Featuring 11 oval inductors divided into 3 cooking zones, each zone on the Liberty® Induction Cooktop can accommodate pots and pans from 4" to 10", as well as teppanyaki grills that can measure up to 16" long.

★ Liberty[®] HeatShift[®]

Thermador HeatShift allows you to change the power level by simply moving the pot across the cooking zone. Perfect for recipes that require moving from a sauté to a simmer.

★ Liberty[®] MoveMode[®]

Finished cooking the main course and ready to prepare the sauce? MoveMode allows easy transfer of settings without having to reset power levels when moving a pot across the cooktop.

★ Liberty[®] PanBoost[®]

Ideal for cooking with oil in a pan, PanBoost technology provides 30 seconds of maximum power, then automatically lowers heat to continue cooking.

★ Liberty[®] CookSmart[®]

Get consistent results for even the most complex recipes. CookSmart includes 5 preset frying levels so each dish is as exceptional as the last.

Liberty[®] Stopwatch Timer

Rather than counting down, this timer counts up to indicate how much time has passed since a meal has been cooking.

Thermador[®] Connected Experience: Liberty[®] Cooktop-Hood Sync

The cooktop and matching hood can communicate with one another to synchronize turning on task lighting and ventilation.

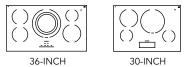

LIBERTY[®] INDUCTION

Liberty Induction Cooktop 36-INCH – CIT367XGS

HERITAGE INDUCTION

COOKTOPS

***** 17 Power Levels

Illuminated touch controls with 17 power settings is highly precise and allows for easy cleaning.

★ Silver Mirror Finish

In addition to black, options include a stunning silver mirrored finish to create a unique design statement for the contemporary kitchen.

★5_500WPowerBoost[®]

Get your cookware to a higher temperature faster, so you can quickly boil water for pasta or heat oil before sautéing.

Superior Responsiveness

Induction technology allows instantaneous temperature changes as the power level is adjusted, making it as responsive and flexible as gas cooktops.

Timers For All Elements

Each burner features its own element shut-off timer, making it easier to coordinate the cooking of multiple dishes.

PLANNING INFORMATION

Induction Cooktops

Model Options

Models are available in our heritage black finish as well as our Freedom® dark gray glass, Liberty™ titanium gray glass and silver mirrored finish for those who want a bold, striking alternative that goes perfectly with stainless steel appliances. Be sure to reference the correct model information in this design guide.

Installation Considerations

The information in this design guide provides key features, product dimensions, cutouts and installation specifications. Before installing a Thermador Induction Cooktop, be sure to verify the cutout dimensions and electrical connections. Also, always consult with the installation manual packed with the product for complete details before installing.

Thermador Masterpiece[®] Induction Cooktops may be installed above a Thermador Oven, as long as the minimum distance between the cabinet floor and countertop is maintained. Reference the installation pages in this guide for details on installing above a conventional oven, steam oven, and microwave / speed oven.

Thermador Induction Cooktops may also be installed above a Thermador Warming Drawer to create a convenient cooking center. Refer to the warming drawer section for additional specifications.

Ventilation Requirements

We strongly recommend that a Thermador Ventilation Hood be installed with all Thermador Masterpiece® Induction Cooktops. The hood must be installed according to instructions furnished with the hood. Refer to the ventilation section or www.Thermador.com for a complete selection of ventilation options, blowers, and accessories.

Installation Requirements

For safety reasons, the provided heat shield must be installed when closed cabinets are used. Some solid surface countertops require special installation. For example, heat reflective tape or rounded corners may be necessary. Contact the countertop manufacturer for instructions specific to your countertop.

Warning

To reduce the risk of ignition of nearby combustible materials, install the countertop with a minimum distance of 2" (51 mm) from both side walls and the back wall.

Electrical Specifications

Be sure your appliance is properly installed and grounded by a qualified technician. Installation, electrical connections and grounding must comply with all applicable local codes.

All induction cooktops are dual rated, designed to be connected to either 240 / 208V AC, 60 Hz, 3-wire, single-phase power supply.

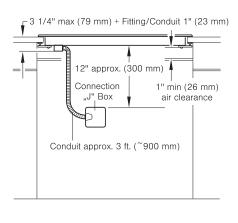

Install a suitable conduit box (not furnished). An appropriately-sized, UL-listed conduit connector must be used to correctly attach the conduit to the junction box.

	· · · · · · · · · · · · · · · · · · ·

IMPORTANT: Local Codes may vary; installation, electrical connections and grounding must comply with all applicable local codes. If required by the National Electrical Code (or Canadian Electrical Code), this appliance must be installed on a separate branch circuit.

Electrical Location

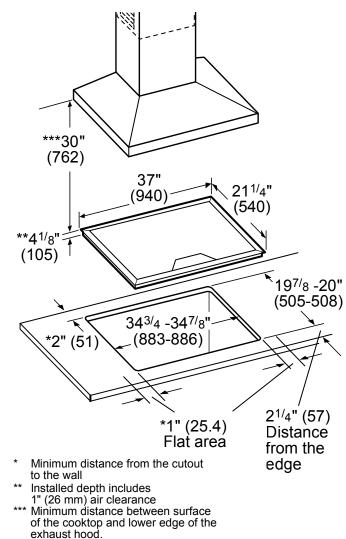

The junction box must be located within 3 feet (~900 mm) of the cooktop connection. It should be easily accessible for service purposes.

Induction Cooktops

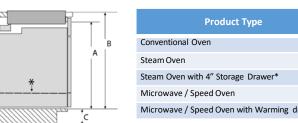

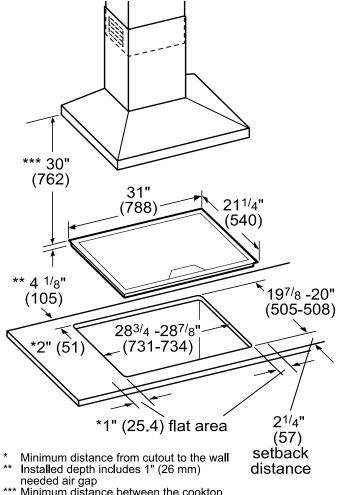

Measurements in inches(mm in brackets)

NOTE: The work surface should be horizontal and level. The stability of the countertop should be confirmed even after making the cutout.

30-Inch & 36-Inch Induction Cooktop Installation Above a Thermador Built-In Oven

is required. Reference the table for dimensions. Refer to the oven installation guide for all other measurements

*** Minimum distance between the cooktop surface and lower edge of exhaust hood

measurements in inches (mm in brackets)

NOTE: The work surface should be horizontal and level. The stability of the countertop should be confirmed even after making the cutout.

ELECTRIC

COOKTOPS

With a dual-zone heat bridge, redesigned control panels, updated finishes and a variety of layouts to choose from, Thermador Electric Cooktops allow you to truly personalize the way you cook.

★ CookSmart®

Get consistent results for even the most complex recipes. CookSmart includes 4 preset frying levels so each dish is as exceptional as the last.

★ Heat Bridge Element

A Thermador[®] Exclusive, this unique dual zone bridge element connects two round elements, enabling use of large oval or rectangular cookware to provide even heating, limiting cold spots.

PowerBoost[®]

Designed to bring food to the desired temperature in the shortest amount of time, PowerBoost delivers maximum powerful output.

Triple Element

Thermador electric cooktops feature three differently sized elements set in one location to adapt to the size of your cookware.

FEATURES & BENEFITS

- ★ CookSmart[®] with 4 preset frying levels, a sensor controls the temperature of the pan, taking the guesswork out of temperature selection
- ★ Dual zone bridge element accommodates oblong cookware and multiple diameter sizes
- Cook timer allows you to set a cook time for any element and turns off automatically once time has elapsed
- Triple zone center element allows you to match element size to various sized cookware
- Illuminated touch control panel offers intuitively simple selection of power levels and allows for easy cleaning

GENERAL PROPERTIES

PLANNING INFORMATION

Electric Cooktops

Model Options

There are two sizes of Masterpiece[®] Electric Cooktops to choose from—30-inch and 36-inch. Models are available with mechanical controls and touch controls in a variety of cooktop configurations to fit your client's cooking style. Be sure to reference the correct model information in this design guide.

Installation Considerations

The information in this design guide provides key features, product dimensions, cutouts and installation specifications. Before installing a Thermador Masterpiece® Electric Cooktop, be sure to verify the cutout dimensions and electrical connections. Also, always consult with the installation manual packed with the product for complete details before installing.

Thermador Masterpiece® Electric Cooktops may be installed above a Thermador Oven, as long as the minimum distance between the cabinet floor and countertop is maintained. Reference the installation pages in this guide for details on installing above a conventional oven, steam oven, and microwave / speed oven.

Thermador Masterpiece® Electric Cooktops may also be installed above a Thermador Warming Drawer to create a convenient cooking center. Refer to the warming drawer section for additional specifications.

CEM366TB	•
CET305TB	•
CEM305TB	•

Prepare The Countertop

Some solid surface countertops require a special cutout size and installation. For example, heat reflective tape or rounded corners may be necessary. Contact the countertop manufacturer for instructions specific to your countertop.

Ventilation Requirements

We strongly recommend that a Thermador Ventilation Hood be installed with all Thermador Masterpiece® Electric Cooktops. The hood must be installed according to instructions furnished with the hood. Refer to the ventilation section or www.Thermador.com for a complete selection of ventilation options, blowers, and accessories.

Warning

To reduce the risk of ignition of nearby combustible materials, install the countertop with a minimum distance of 2" (51 mm) from both side walls and the back wall.

Electrical Specifications

Be sure your appliance is properly installed and grounded by a qualified technician. Installation, electrical connections and grounding must comply with all applicable local codes.

All Thermador Electric Cooktops are dual rated, designed to be connected to either 240 / 208V AC, 60 Hz, 3-wire, single-phase power supply.

Install a suitable conduit box (not furnished). An appropriately-sized, UL-listed conduit connector must be used to correctly attach the conduit to the junction box.

CET366TB	50 / 40 A
CEM366TB	50 / 40 A
CET305TB	40 / 30 A
CEM305TB	40 / 30 A

IMPORTANT: Local Codes may vary; installation, electrical connections and grounding must comply with all applicable local codes. If required by the National Electrical Code (or Canadian Electrical Code), this appliance must be installed on a separate branch circuit.

Electrical Location

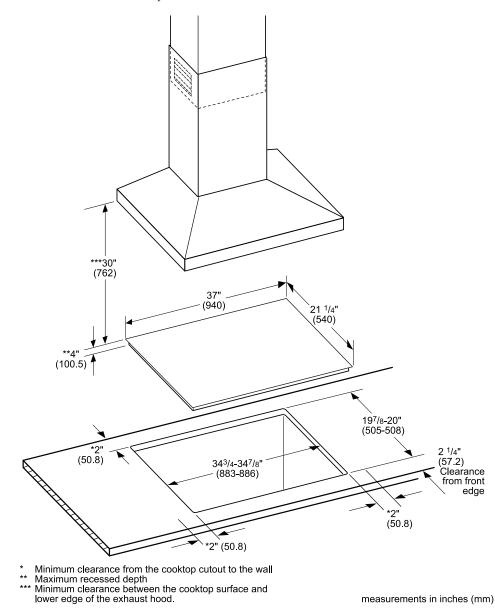

The junction box must be located within 3 feet (~900 mm) of the cooktop connection. It should be easily accessible for service purposes.

INSTALLATION

Electric Cooktops

When installing an oven or oven with a drawer in combination with a cooktop, a minimum distance between the cabinet floor and countertop (B) is required. Reference the table for dimensions. Refer to the oven installation guide for all other measurements.

VENTLATION FOR MASTERPIECE® & PROFESSIONAL COLLECTIONS

The perfect complement to the Thermador® cooking collection, newly designed Professional and Masterpiece Ventilation systems adhere to your design aesthetic, while catering to your culinary needs.

Spotlight Feature

Home Connect[™] offers custom functionality like automatic start and shut-off, as well as notifications via the mobile app.

CUSTOM INSERT

Professional 48-INCH – VCIN48GWS THERMADOR | VENTILATION

WALL HOODS

PROFESSIONAL & MASTERPIECE*

Create a bold, modern statement with a distinctive wall hood designed to compliment our Masterpiece and Professional cooking collections.

Under Cabinet Drawer Hood

Featuring a sleek, slim design that seamlessly incorporates with surrounding cabinetry, these hoods are crafted with stunning gray glass.

Powerfully Quiet

Discover the blower option that will help maximize performance in your kitchen—but not the noise. Available with integral, inline or remote blowers ranging from 600 CFM to 1300 CFM, the Professional Collection of Ventilation is designed for a powerfully quiet cooking experience.

LED Lighting

All Thermador Wall Hoods feature multi-level, vivid LED lighting highlighting your first course to the last.

Delay Shut-Off & Automatic Mode

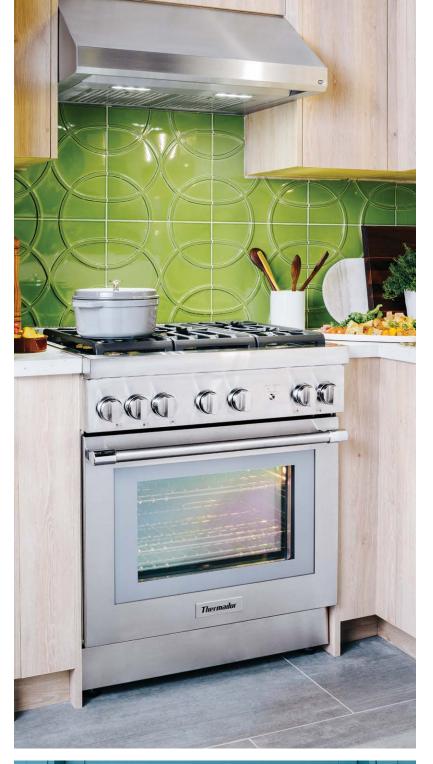

Thermador hood features include Automatic Mode, that adjusts the fan speed according to your cooking style, as well as delay shut off, which runs the hood 10 minutes after you are done cooking to remove any lingering odors.

Heat Lamp

Keep food warm until it's ready to be served with infrared heat lamps on either side of the hood. The left and right heat lamps can also be used independently from each other and the hood.

★ Thermador[®] Connected Experience

The Thermador Connected Experience by Home Connect[™], offered on select models, provides added flexibility and personalization, so you can program custom functionality like automatic start and shut-off, mobile notifications, and more using the mobile app.

CHIMNEY WALL HOODS

PROFESSIONAL & MASTERPIECE*

With adjustable chimney height to accommodate both high and low ceilings, you can customize your ventilation to meet your design needs.

Noise Control Technology

Ventilation should be seen, not heard. Thermador Noise Control and Noise Control Deluxe[™] notably reduce noise while hood is in use—so you can keep your focus on entertaining.

★ Drawer-Style Hoods

Exclusive to Thermador, Masterpiece® Drawer hood options include a chimney drawer hood or under cabinet version, featuring an increased capture area and a design that integrates with surrounding cabinetry.

Electronic Touch Control

The sleek electronic touch control panel is easy-to-use and easy-to-clean.

★ Thermador[®] Connected Experience

The Thermador Connected Experience by Home Connect[™], offered on select models, provides added flexibility and personalization, so you can program custom functionality like automatic start and shut-off, mobile notifications, and more using the mobile app.

ISLAND HOODS

PROFESSIONAL & MASTERPIECE*

Creating a dramatic focal point in your kitchen, Thermador sleek and slim island hoods are purposefully designed to provide powerful performance without obstructing the view.

Noise Control Technology

Ventilation should be seen, not heard. Thermador Noise Control and Noise Control Deluxe[™] notably reduce noise while hood is in use—so you can keep your focus on entertaining.

Delay Shut Off & Automatic Mode

Thermador hood features include Automatic Mode, that adjusts the fan speed according to your cooking style, as well as delay shut off, which runs the hood 10 minutes after you are done cooking to remove any lingering odors.

★ Thermador[®] Connected Experience

The Thermador Connected Experience by Home Connect[™], offered on select models, provides added flexibility and personalization, so you can program custom functionality like automatic start and shut-off, mobile notifications, and more using the mobile app.

DOWNDRAFT

MASTERPIECE*

Masterpiece downdraft ventilation are designed to pair with select Masterpiece cooktops and to seamlessly integrate within your countertop when not in use.

DOWNDRAFT

Telescopic Design

Available in two heights, 15" and 18" the telescopic design rises to capture heat, smoke, grease, and steam.

Powerfully Quiet[®]

Powerfully Quiet and efficient in operation at 1.2 sones (UCVP36XS) or 1.5 sones (UCVM30XS, UCVM36XS) on low speed.

LED Lighting

Thermador 18" downdraft feature multi-level, vivid LED lighting to help to set the stage for dinner party preparations. (UCVP36XS only)

Personalization Options

Masterpiece Downdraft is available with six discharge connections, including front, side, rear and downward exhaust options, as well as recirculation—so you are not limited by kitchen design or pre-determined space.

Delay Shut Off & Automatic Mode

Thermador hood features include Automatic Mode, that adjusts the fan speed according to your cooking style, as well as delay shut off, which runs the hood 10 minutes after you are done cooking to remove any lingering odors.

CUSTOM INSERTS

PROFESSIONAL & MASTERPIECE*

Whether you choose to blend in with your surrounding cabinetry or create a statement piece, you can opt for wall or island applications to suit your style and cooking surface.

Custom Hood Insert

Specially designed for custom hood applications to create a concealed ventilation system within your kitchen design.

Push Button Controls

Concealed three-speed, push-button controls easy to operate and integrate seamlessly.

Remote Ventilation Control

Remote controls for customized ventilation applications are easy to use and have a sophisticated and professional style.

Delay Shut Off & Automatic Mode

Thermador hood features include Automatic Mode, that adjusts the fan speed according to your cooking style, as well as delay shut off, which runs the hood 10 minutes after you are done cooking to remove any lingering odors.

★ Thermador[®] Connected Experience

The Thermador Connected Experience by Home Connect[™], offered on select models, provides added flexibility and personalization, so you can program custom functionality like automatic start and shut-off, mobile notifications, and more using the mobile app.

For optimal performance, the width of the hood should equal that of the cooktop or rangetop or exceed it by 3 inches on either side. Install these hoods only with Thermador Blowers. †With the exception of Downdraft Ventilation, 30-Inch and 36-Inch Masterpiece Ventilation is also compatible with 30-Inch Pro Harmony Ranges and 30-Inch Professional Rangetops.

• Home Connect NOTE: Hood Sync between ventilation and cooktops is available only on Thermador Freedom[®] and Liberty[®] cooktops that feature Home Connect.

PLANNING INFORMATION

Ventilation

Installation Considerations

Hood Width

The hood width should be no less than the width of the cooking surface. Where space is not restricted, a wider hood can be used to increase your capture area.

Distance from Cooking Surface

Proper mounting height is very important. If a hood is mounted too low, it may be difficult to cook and be unsafe. If a hood is mounted too high, performance may be compromised. For optimal performance, the distance from the cooking surface to the bottom of the hood should be a minimum of 30", unless otherwise noted. Please refer to the installation manual for each hood and cooktop / range model for proper hood mounting heights.

Available Ceiling Height

The standard ceiling height can vary from region to region and in homes built in different eras. Ceiling heights, even in the same room, can sometimes vary by as much as several inches. Kitchen ceiling heights can vary between 7'6" (or 90") to over 10' (or 120").

Before selecting a Thermador Hood, check the available installation space and any extra space that may remain after proper installation of a hood and cooktop or range. This extra space can be filled using Thermador stainless steel duct cover accessories or integrated with kitchen cabinetry. The space can also be adjusted by raising or lowering your hood within the recommended range (typically 30" to 36" above the cooking surface).

Choosing the Correct Blower

A variety of interior and exterior blower options (Remote, Inline or Integrated) are available for Thermador Professional and Masterpiece® Hoods. If the unit you have selected does not have a blower, one can be purchased separately. Blower selection will vary based on the volume of air that needs to be moved and the length and location of the duct run. For long duct runs with multiple turns and bends, consider using a more powerful blower. For the most efficient air flow exhaust, use a straight run or as few elbows as possible.

Remote Blowers (VTR Series)

Depending on your preference and ducting situation, these blowers can be mounted on the roof or exterior wall of your home. An exterior installation may be more appealing to reduce noise in the kitchen.

Inline Blowers (VTI Series)

To minimize noise in the kitchen, these blowers are mounted along the duct line anywhere between the kitchen and the exterior wall. If you have easy access to your duct line (in an attic, for example), this may be an appealing option.

Integrated Blowers (VTN series)

These blowers are purchased separately and integrated into the hood or onto the downdraft unit at the time of installation. This option allows you to select your ideal hood with the exact power you require. Integrated blowers are included with HPWB30FS, HPWB36FS and HPWB48FS.

SPECIAL NOTE: Always allow access to the blower for serviceability, should it be needed.

Choosing the Right CFM

The power of the cooktop or range, measured in BTU, is perhaps the most important factor in determining CFM needs for a hood.

You should also consider the cooking space and cooking style of your client.

- More demanding cooks usually require more exhaust capacity to handle moisture generated by boiling large pots of water or the grease and smoke resulting from grilling or frying. This cooking style could require a hood or downdraft system with airflow of 600 to 1.300 CFM.
- For those who are used to preparing quick meals in a relatively small kitchen, a hood with 600 CFM may be adequate ventilation for the cooking space.
- If the cooking surface is in a peninsula or island, a larger capacity hood can provide better capture when there are cross currents and when the hood needs to be mounted higher. Downdraft ventilation systems are also a good alternative.
- High heat cooking or aromatic foods may require additional CFM. Increasing capture area by 3" on each side is also a recommended way to address this issue.

Length and Size of Duct Work

Do not use flexible duct; it creates back pressure / air turbulence and reduces performance.

Straight runs and gradual turns are best. Use the shortest route with the fewest turns possible.

Proper performance is dependent upon proper ducting. Use a qualified and trained installer. Local building codes may require the use of makeup air systems when using ducted ventilation systems greater than specified CFM of air movement. The specified CFM varies from locale to locale. Consult your HVAC professional for specific requirements in your area.

If using a 10" duct, Thermador recommends not exceeding 50 feet of duct. Transitions, elbows and wall or roof caps are all factors that will add more static pressure, therefore increasing your equivalent duct run.

PH48GWS 27-INCH DEPTH WALL HOOD (48-INCH WIDTH) **PROFESSIONAL® SERIES**

FEATURES & BENEFITS

- 27" in depth, a perfect companion to Pro Grand® **Professional Ranges**
- ★- Equipped with the Thermador Connected Experience by Home Connect[™]
- Powerfully Quiet[®] system accepts integral, inline, and remote blowers
- Keep food warm until it's ready to be served with two independently controlled infrared heat lamps
- Beautiful illumination with multi-level, vivid LED lights

ACCESSORIES (OPTIONAL)

25 ft. Blower Connector Cable - EXTNCB25W

EXTNCB25W - For use with the following inline and remote blowers: VTR630W, VTR1030W, VTR1330W, VTI610W, VTI1010W

Roofplates

RFPLT600P - For use with 600 CFM remote blower VTR630W

RFPLT1000P - For use with 1000 CFM remote blower VTR1030W and 1300 CFM blower VTR1330W

Wall Hoods

Model Options

When selecting a ventilation system, choose from one of our two sophisticated appliance collections. Select from the Professional Collection for the ultimate in cooking and venting power or the Masterpiece® Collection for its sleek styling and numerous convenience functions. Thermador Wall Hoods are available in various depths and heights to fit your kitchen plans and are meticulously crafted for both function and design. Be sure to reference the correct model information in this design guide.

Electrical Specifications

Be sure your Thermador Wall Hood is properly installed and grounded by a qualified technician. Installation, electrical connections and grounding must comply with all applicable local codes.

Install a suitable conduit box (not furnished). An appropriately-sized, ULlisted conduit connector must be used to correctly attach the conduit to the junction box. Remote blowers require a 5-wire installation.

Installation Considerations

The information in this design guide provides key features, product dimensions, cutouts and installation specifications. Before installing a Thermador Wall Hood, be sure to verify the cutout dimensions and electrical connections. Also, always consult with the installation manual packed with the product for complete details before installing.

Installation Options

Thermador Wall Hoods may be installed above a Thermador Range or Cooktop to create a convenient cooking center. Refer to the ventilation selection guide for compatibility.

Hood installation height above a range or cooktop can vary. To obtain the necessary installation height above a Thermador Range or Cooktop, consult the appliance's installation manual. Accessory 6" and / or 12" tall duct covers are used to fill the space between the hood and ceiling.

Thermador Wall Hoods can be mounted on a wall or suspended from a cabinet. The cabinet must be structurally joined to the wall studs to support the weight of this hood.

Chimney Wall Hoods

Model Options

Thermador Chimney Wall Hoods feature sleek styling and numerous convenience functions. Chimney Wall Hoods are available in 30-inch, 36-inch and 48-inch widths and are adjustable to suit a range of ceiling heights. All stainless steel or stainless steel with glass designs are available. Be sure to reference the correct model information in this design guide.

Electrical Specifications

Be sure your Thermador Chimney Wall Hood is properly installed and grounded by a qualified technician. Installation, electrical connections and grounding must comply with all applicable local codes.

If possible, site the earthed socket directly behind the chimney paneling. The grounded socket should be connected via its own circuit. If the grounded socket is no longer accessible following installation of the hood, ensure that there is a permanently installed disconnector.

Installation Considerations

The information in this design guide provides key features, product dimensions, cutouts and installation specifications. Before installing a Thermador Chimney Wall Hood, be sure to verify the cutout dimensions and electrical connections. Also, always consult with the installation manual packed with the product for complete details before installing.

Installation Options

Thermador Chimney Wall Hoods may be installed above a Thermador Range or Cooktop to create a convenient cooking center. Refer to the ventilation selection guide for compatibility.

Hood installation height above a range or cooktop can vary. To obtain the necessary installation height above a Thermador Range or Cooktop, consult the appliance's installation manual. An accessory Hood Extension can be used to fill the space between the hood and ceiling.

Thermador Wall Hoods can be mounted on a wall or suspended from a cabinet. The cabinet must be structurally joined to the wall studs to support the weight of this hood.

Island Hoods

Model Options

Thermador Island Hoods are available in 40-inch, 42-inch and 48-inch widths and feature a stainless steel design and the 40-inch has an elegant glass canopy. All of our island hoods are adjustable to suit ceiling heights of up to 9'.

Electrical Specifications

Be sure your Thermador Island Hood is properly installed and grounded by a qualified technician. Installation, electrical connections and grounding must comply with all applicable local codes.

Installation Considerations

The information in this design guide provides key features, product dimensions and installation specifications. Before installing a Thermador Island Hood, be sure to verify the dimensions and electrical connections. Also, always consult with the installation manual packed with the product for complete details before installing.

Installation Options

Thermador Island Hoods may be installed above a Thermador Range or Cooktop to create a convenient cooking center. Refer to the ventilation selection guide for compatibility.

Hood installation height above a range or cooktop can vary. To obtain the necessary installation height above a Thermador Range or Cooktop, consult the appliance's installation manual.

Thermador Island Hoods are suspended from the ceiling. The minimum ceiling height required is 97 3/16".

Downdraft

Model Options

Thermador Downdraft Hoods are available in 30 and 36-inch widths to fit your kitchen plans and are meticulously crafted for both function and design. Be sure to reference the correct model information in this design guide.

Electrical Specifications

Be sure your Thermador Downdraft Hood is properly installed and grounded by a qualified technician. Installation, electrical connections and grounding must comply with all applicable local codes.

Installation Considerations

The information in this design guide provides key features, product dimensions, cutouts and installation specifications. Before installing a Thermador Downdraft Hood, be sure to verify the cutout dimensions and electrical connections. Also, always consult with the installation manual packed with the product for complete details before installing.

Installation Options

The Thermador Downdraft Hood System is available in 30-inch or 36-inch widths. It is intended for installation with Thermador nonprofessional gas, electric or induction cooktops only.

Thermador Downdraft Hoods may be installed in a wall or island behind a Thermador non-professional gas, electric or induction cooktop to create a convenient cooking center. Refer to the ventilation selection guide for compatibility.

Custom Inserts

Model Options

Thermador Custom Hood Inserts are available for both professional and non-professional applications. The Professional Custom Hood Inserts are available in 36-inch, 42-inch, 48-inch, 54-inch and 60-inch widths. The Masterpiece[®] Custom Hood Inserts are available in 30-inch, 36-inch, and 48-inch widths.

Electrical Specifications

Be sure your Thermador Custom Insert is properly installed and grounded by a qualified technician. Installation, electrical connections and grounding must comply with all applicable local codes.

Installation Considerations

The information in this design guide provides key features, product dimensions and installation specifications. Before installing a Thermador Custom Hood Insert, be sure to verify the dimensions and electrical connections. Also, always consult with the installation manual packed with the product for complete details before installing.

Installation Options

Thermador Custom Hood Inserts may be installed above a Thermador Range or Cooktop to create a convenient cooking center. Refer to the ventilation selection guide for compatibility.

Hood installation height above a range or cooktop can vary. To obtain the necessary installation height above a Thermador Range or Cooktop, consult the appliance's installation manual.

Thermador Custom Hood Inserts within custom hood applications create a seamless design with wall or island applications.

Freedom Refrigeration 36-INCH - T36IR900SP

FEATURES

FREEDOM® REFRIGERATION

★ Cool Air Flow Technology

Thermador refrigerators and freezers have never been more energy efficient. Cool Air Flow—upgraded with a quieter fan—is proprietary Thermador technology that evenly distributes cold air throughout all parts of the unit.

Theater Lighting

Theater-style, diffused lighting, ensures visibility while limiting hot spots.

Open Door Assist

With the flexibility to either push or pull to open, Thermador Auto Door Opening technology adds a luxurious touch.

TFT Display

A touch-screen TFT display panel controls settings, including individual temperature control, lighting and Open Door Assist.

Soft-Close Drawers

Revel in a gentle, quiet glide when you open or close interior drawers.

All-Leg Leveling

All-leg leveling allows for quicker and faster installation.

★ Thermador[®] Connected Experience

Select models feature *The Thermador Connected Experience by Home Connect*[™], with capabilities including remote control settings to control temperature, open door notifications and water filter notifications.

FRESH FOOD COLUMNS

FREEDOM® REFRIGERATION

Featuring first of its kind innovation, Thermador Freedom Fresh Food Columns are customizable both inside and out.

★ Delicate Produce Bins

Avoid bruised produce and damaged herbs. Store your fresh-from-the-garden fruits and vegetables in luxury with removable Soft-Close Delicate Produce Bins.

★ 23.5-Inch Precise Fit Refrigeration

Specially designed 23.5" refrigeration is made for pairing with 18" and 24" freezer columns to accommodate predetermined 42" and 48" spaces.

★ ThermaFresh System

Controlled independently, the ThermaFresh System provides humidity control and temperature management where you need it most.

★ Free Flow[®] Cold Air System

Free Flow Cold Air System adjusts the temperature of refrigeration doors to help keep items placed on interior shelves cool.

★ Redesigned Gallon Bins

The shelving system has been redesigned specifically to accommodate gallon-sized containers, and offers a variety of placement options on the refrigerator door.

36-Inch Fresh Food Column

36" columns offer ample space for interior storage, enabling you to customize different sizes for fresh food preservation.

CUSTOMIZE YOUR COOLING

FREEDOM[®] REFRIGERATION

Whether storing fresh herbs and produce from the farmer's market, or pickled vegetables and homemade jams, newly designed shelving and Delicate Produce Bins can be configured to suit your culinary lifestyle.

WINE COLUMNS

FREEDOM® REFRIGERATION

An absolute must for wine connoisseurs, Thermador Wine Columns can hold up to 92 bottles (up to 99 bottles with additional shelf*) and offer up to three zones to ensure your wines are stored at the optimum temperature and humidity. Wenge wood diamond dowels cradle each bottle, while a Presenter Shelf puts your favorites on display. Whether you're hosting a large gathering or simply enjoying a glass of wine at the end of the day, Thermador Wine Columns make every sip exceptional.

2 ZONES

570

Thermador

24-INCH 3 ZONES

★ Presenter Shelf

A newly designed Presenter Shelf made of Wenge wood and aluminum boasts a stylish design allowing you to place your favorite wines front and center.

★ Diamond Dowles

Unique, diamond-shaped wooden dowels help control wine sediment by cradling bottles of every size for stability, as well as offer elegant presentation.

Hidden Rails

In these newly designed wine columns, the ball bearings and rails are completely out of sight. All you can see—and feel—is luxury.

3-Zone Temp Control

From Chardonnay, to Pinot, to Rosé, store all of your wines at the optimum temperature. The Thermador 24" Wine Column features UV glass and is equipped with three separate zones for individual temperature control.

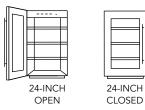

*Additional shelf sold separately; see accessories section, page 408

GLASS DOOR REFRIGERATORS

UNDER-COUNTERFREEDOM® REFRIGERATION

Our Glass Door Refrigerator, featuring SoftClose® hinges, is ideal for storing sparkling water, beer growlers and charcuterie boards—essentially the perfect companion to any entertainment room.

Adjustable Tempered Glass Shelves

Customize refrigeration storage with adjustable glass shelves to accommodate both food and beverage needs.

Customizable Temperature Management

Enhanced cooling keeps contents at the appropriate temperatures for serving, and provides temperatures as low as 33°.

Glass & Aluminum Trim

Durable glass shelves are trimmed with aluminum, providing a luxurious finish.

SoftClose® Door Hinges & Door Open Alarm

Our innovative door hinge allows for a 115° door opening and can be positioned to stop at a 90° angle, with Door Open Alarm alert if door is left ajar.

LED Lighting

Brighter, whiter, LED lighting illuminates stored items providing visibility to all your culinary needs.

Star-K and ENERGY STAR[®] Certified

Proudly Star-K and ENERGY STAR® Certified.

XX

GLASS DOORWINE RESERVES

UNDER-COUNTER FREEDOM® REFRIGERATION

Featuring Wenge wood diamond dowels, SoftClose® hinges and dual zone temperature management, all you need to do is to pick a room to store and preserve your wine collection.

Full Extension Wine Racks

Removable and cantilevered for adjustability, Wenge wood dowels have been redesigned to promote stability and less sediment movement, and full-extension racks enhance the experience of pulling out your favorite vintage.

Dual-Zone Temperature Management

Enhanced adjustable cooling zones are perfect for keeping wine at the appropriate temperatures for serving or aging.

UVResistant Tempered Glass

UV Resistant Tempered Glass protects your wine collection from dangerous ultraviolet rays that can prematurely age fine wine.

SoftClose® Door Hinges & Door Open Alarm

Our innovative door hinge allows for a 115° door opening and can be positioned to stop at a 90° angle, with Door Open Alarm alert if door is left ajar.

LED Lighting

Brighter, whiter, LED lighting illuminates stored items providing visibility to all your culinary needs.

Proudly Star-K Certified.

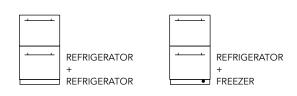

DOUBLE DRAWERS

UNDER-COUNTER FREEDOM® REFRIGERATION

The ultimate accessory for any kitchen, master suite, or game room, Thermador Double Drawer Refrigerators feature SoftClose® sliders and easy to clean rubber mats.

And with customizable temperature settings, shelving and dividers you can chill everything from cocktail garnishes, to green juice, to organic skin care.

Customizable Temperature Management

Refrigerator drawers offer customizable cooling modes—ideal for beverages as well as skin care products requiring storage at cooler temperatures. Drawers also feature a warmer pantry or cellar mode, and a bar mode for super-chilled beverages.

SoftClose® Drawers & Drawer Open Alarm

Innovative sliders provide a new level of luxury with a gentle, automatic close. Also includes Drawer Open Alarm to alert you if drawer is left ajar.

Removable Drawer Mat

Each drawer includes a flexible and durable mat to ensure bottles and other delicate items do not slide when the drawer is opened and closed, and is easily removable for easy cleaning.

Customizable Drawer Dividers & Shelving

Removable and completely customizable, aluminum dividers keep drawer contents neatly tucked in place. They can also be reconfigured to create custom shelving allowing two levels of drawer storage and room for platters.

Filtered Automatic Ice Maker

Automatic filtered ice maker in the freezer drawer ensures you are always prepared for refreshing drinks when entertaining.

Star-K and ENERGY STAR® Certified Proudly Star-K and ENERGY STAR® Certified.

Spotlight Feature

Think outside the kitchen and incorporate refrigeration columns and undercounter double drawers in master suites, guest and game rooms.

T18ID900RP **18-INCH BUILT-IN FREEZER COLUMN WITH ICE & WATER DISPENSER**

FREEDOM® COLLECTION, PANEL-READY, RIGHT-HAND DOOR SWING

Also Available In: T18ID900LP – Left-Hand Door Swing

FEATURES & BENEFITS

- Freedom[®] Hinge enables true flush design
- Auto Door Opening provides the opening of the door with just a slight push or pull
- Energy Efficient Diamond Ice made with twist tray technology - Smooth Filtered Lighting for clear and easy viewing of all
- product
- SoftClose[®] Drawers for easy and controlled storage
- Sleek clean design for the perfect symmetry when paired with additional columns
- TFT control panel managing all your columns functions

T18IW900SP 18-INCH BUILT-IN WINE PRESERVATION COLUMN

GENERAL PROPERTIES

FREEDOM[®] COLLECTION, PANEL-READY

FEATURES & BENEFITS

- Freedom® Hinge enables true flush design

- Auto Door Opening provides the opening of the door with just a slight push or pull
- Two Independent Temperature Zones for your entire collection
- Smooth Filtered Lighting for clear and easy viewing of all product
- TFT control panel managing all your columns functions
- Sleek clean design for the perfect symmetry when paired with additional columns

Panel Ready	Yes
Reversible Door Swing	Yes
SoftClose® Door	Yes*
Carbon Air Filter	Yes
Lighting	LED Sidewall and Theater Lighting
Number of Shelves	12
Number of Slide-out Shelves	10
Shelf Material	Wenge Wood / Aluminum Frame
Full Extension Drawers @ 115° Door Opening Angle	Yes
Full Extension Drawers @ 90° Door Opening Angle	Yes
Presenter Shelf with Light	Yes
Portable Aluminum Wine Presenter	Yes
Type of Glass Door	Tempered and UV-protective
Number of Temperature Zones	2
Door Open Alarm	Yes
Open Door Assist	Yes
Special Modes	Sabbath, Economy, Vacation

PLANNING CHECKLIST

Freedom[®] Collection

This custom product requires attention to the finest details. Did you reme

- Choose a desired configuration side-by-side or standalone columns (See pages 414–417 for details)
- Plan the cutout height(s) 84" (See pages 414–417 for details)
- Plan the cutout width(s) depends on configuration and column width (See pages 414–417 for details)
- Plan the cutout depth 25" for North American style cabinets, 24" with installation frame accessory, 24" for European style cabinets (See pages 414–417 for details)
- Ensure the cutout interior (top and sides) is flush to the appliance at a depth of min. 4", preferably 6" from face frame (See pages 414–417 for details)
- Ensure the cutout interior returns (top and sides) are finished to match exterior at a depth of min. 4", preferably 6" from face frame (See pages 414–417 for details)
- Ensure proper clearance for appliance doors including handle(s) – check for interference with other appliances, open or closed cabinets and doors, nearby walls (See page 410 for details)
- Properly site the electrical outlet and (if applicable) water box (See pages 412–413 for details)

Also Available In: T36BT920NS – Professional Series Handles

COMMON CONFIGURATIONS

Freedom[®] Collection

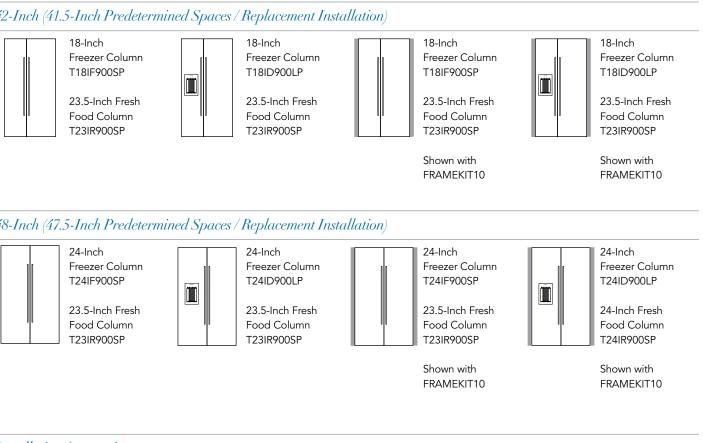

The Thermador® Freedom® Collection uses independent columns that create unlimited flexibility in both function and design. Some suggested pairings are listed below. A special kit is included with all freezer columns to simplify traditional side-by-side refrigerator / freezer combinations. When combining two appliances where one is not a freezer column or if any two units are installed less than 6" (152 mm) apart from one another but not connected sideby-side, always use the Heater Kit (HEATRKIT20) to guard against damaging condensation build-up.

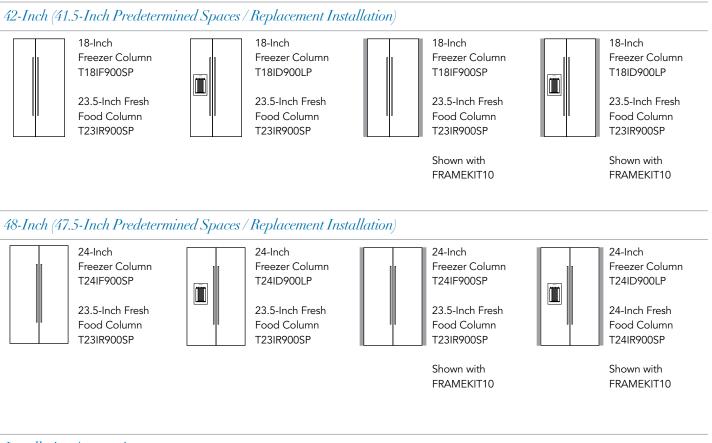

COMMON CONFIGURATIONS

Freedom[®] Collection

You don't need to remodel your kitchen to enjoy complete personalization. The specially-designed 23.5" refrigerator unit features the same interior capacity as a 24" column, but has been crafted to seamlessly pair with any 18" and 24" freezer. Together, they will perfectly fit into predetermined 42" or 48" spaces—without the need to adjust existing cabinetry.

Installation Accessories

< 6" (<152 mm)

Heater Kit Required

Freedom^{*} Frame Kit Included with all pre-assembled bottom freezers, this adjustable frame is also available as an optional accessory for use with any custom column for installation in 24-inch (610 mm) deep cutouts. The kit includes two identical and reversible metal side trims whose placement between the interior cutout wall and the appliance helps overcome the challenge of unfinished cabinet returns.

HEATRKIT20 – 13W @ 120V Freedom[®] Heater Kit

When two appliances are installed side-by-side a sealing kit must be used. For combinations that involve a freezer column, this kit is included. For all other (non-traditional, i.e. two wine columns, two bottom freezers, etc.) side-by-side combinations or instances where any appliances are installed less than 6-inches (152 mm) apart from one another but not connected side-by-side, purchase this kit. PLANNING INFORMATION

Freedom[®] Collection

Installation Considerations

Location

The appliance should be installed in a dry, ventilated room. It may not be installed outdoors. The ambient temperature of the room must be between 55°F (13°C) and 100°F (43°C).

The appliance should not be exposed to constant direct sunlight or excessive heat. If installation next to a heat source, such as an oven, radiator, etc. is unavoidable, observe the following minimum distances from the heat source:

- 1 1/4" (30 mm) from an electric cooking appliance,
- 11 ¹³/16" (300 mm) from an oil or solid-fuel cooking appliance.

Installation and Cutout Dimensions

Please see pages 414-417 for complete cutout planning information.

It is important to observe the specified dimensions of the installation cutout for a trouble-free installation of the appliance and for the subsequent appearance of the door panel.

- In particular ensure that the cutout is square. Squareness can be checked by suitable means, e.g. spirit level, diagonal measurements, etc.
- The side walls of the cutout must be flush. The minimum thickness of the side and top walls is 5/8" (16 mm). The minimum thickness of toekick panel is 1/4" (6 mm).

Furniture / Fixtures

During installation, the appliance is fastened to adjacent and overhead furniture / fixtures and it is therefore essential that all such furniture / fixtures are well secured to the substructure or adjacent wall.

Flooring / Substructure

On account of the heavy weight of a fully loaded appliance, a loadbearing substructure is required. To ensure correct installation and function, the support must be flat, level and made of hard, rigid material. If in doubt, contact an architect or a building expert.

**Handleless Panels should not be installed on units without the SoftClose® capability. If you are uncertain if you have a refrigeration unit with SoftClose® capability please contact our customer team by calling 1-800-735-4328.

Refer to the following table for load-bearing capacity:

Appliance	Load Bearing Capacity
23.5-Inch Fresh Food Column	945 lbs. / 429 kg
24-Inch Fresh Food Column	949 lbs. / 431 kg
30-Inch Fresh Food Column	1,097 lbs. / 498 kg
36-Inch Fresh Food Column	1,363 lbs. / 618 kg
18-Inch Freezer Column	774 lbs. / 351 kg*
24-Inch Freezer Column	958 lbs. / 435 kg*
30-Inch Freezer Column	1,116 lbs. / 507 kg
36-Inch Freezer Column	1,353 lbs. / 614 kg
18-Inch Wine Preservation Column	840 lbs. / 381 kg
24-Inch Wine Preservation Column	1,067 lbs. / 484 kg
30-Inch Bottom Freezer, 2-Door	1,135 lbs. / 515 kg**
36-Inch Bottom Freezer, 2-Door	1,399 lbs. / 635 kg**
36-Inch Bottom Freezer, French Door	1,382 lbs. / 627 kg**

*Without water dispenser **Pre-assembled units

INSTALLATION OPTIONS

Freedom[®] Collection

The Freedom® Collection offers a variety of installation possibilities*. In some instances, special accessories are required.

Recommende	ed Installations	Considerations
Stand- Alone		Any Freedom appliance can be installed as a stand-alone unit. Ensure a cutout flush to the appliance at a depth of minimum 4" (102 mm), preferably 6" (152 mm) on the top and sides.
Side-By-Side		When two appliances are installed side-by-side a sealing kit must be used. For combinations that involve a freezer column, this kit is provided. For all other (non-traditional) side-by-side combinations or instances where any appliances are installed less than 6" (152 mm) apart from one another but not connected side-by-side, purchase the Heater Kit (HEATRKIT20).
Split Columns with Partition		When dimensioning the partition, note the thickness of the door panel (including handles) as well as the swivel range to prevent damage if the doors are opened at the same time. (See page 419 for details on door swivel range dimensions)
		Three appliances can be installed together only if a partition—minimum 5/8" (16 mm)—is placed between two of the appliances. Ensure that door panel thickness (including handles) as well as the swivel range are accounted for.
At The End of a Cabinetry Run		All Freedom appliances must be completely enclosed on the top and sides. If one side of the appliance is visible, a decorative side panel must be used. The side panel must be connected firmly to the wall, the floor and any overhead furniture / fixtures before the appliance is placed in the cutout.
Recommende	ed Installations	Concerns
		It is absolutely essential to ensure that the appliance is installed in such a way that the doors do not interfere with an adjacent wall or other kitchen elements. (See page 419 for details on door swivel range dimensions)
		A partition—minimum 5/8" (16 mm)—is required to ensure the doors do not interfere with one another when opened. Use a partition to separate appliances and observe the door swivel range. (See page 419 for details on door swivel range dimensions)
		A Thermador French Door Bottom Freezer cannot be connected side-by-side with any other appliance. Use a partition to separate appliances and observe the door swivel range. (See page 419 for details on door swivel range dimensions)

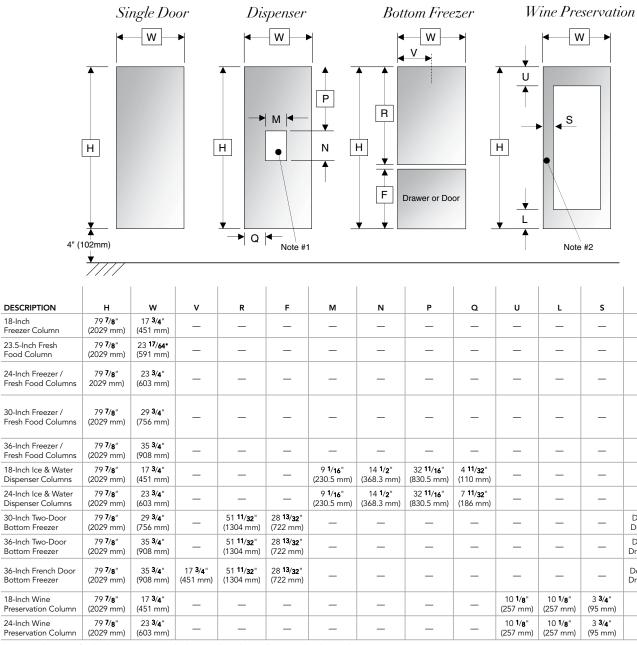

DOOR PANEL DIMENSIONS

Freedom[®] Collection

Each Freedom® Collection refrigeration appliance is designed to be equipped with a decorative door panel. A panel can be custom-made or purchased as a stainless steel accessory. The table below illustrates the dimensions of the stainless steel panel accessories and can be used as a guide in creating custom panels. At 79 7/8" (2029 mm) tall, they are designed for a toekick height of 4" (102 mm), and a total cutout height of 84" (2134 mm) yielding 1/8" (3 mm) reveals. At 3/4" (19 mm) deep, they are designed to attach to the 24" (610 mm) deep appliance for an overall depth of 24 3/4" (629 mm). See page 415 for cutout planning.

When using custom panels, always ensure that the panel reverse is finished to match the exterior, as parts of the panel reverse will be visible when the refrigerator door is opened.

IMPORTANT: While these sketches can serve as a general guide in planning panel dimensions, the correct panel dimensions are dictated by design choices including style and dimensions of surrounding kitchen cabinetry, case and toekick height, etc. Please ensure careful planning based on the specific kitchen design.

NOTE #1: The cutout for the dispenser unit must be horizontally and vertically centered in the panel. NOTE #2: For custom wine preservation column door panels, the width of the two lateral flanges of the frame may vary between 2 1/2" (64 mm) and 3 3/4" (95 mm).

PLANNING INFORMATION

Freedom[®] Collection

Electrical Specifications

The appliance comes with a 3-wire power supply cord. UL listed in the USA.

Each appliance requires a separate 3-wire receptacle that is fitted with a 15 Amp fuse or higher. Refer to the following table for max load details.

Appliance	Max load		
	120V AC, 60Hz		
23.5-Inch Fresh Food Column	15 A

36-Inch 2-Door Bottom Freezer*	15 A		
36-Inch French Door Bottom Freezer*	15 A		
*Including ice maker			

*Including ice maker

The receptacle must be installed by a licensed electrician only.

For the installation position of the receptacle refer to diagram in "Electrical Location".

Grounding Instruction

This appliance must be grounded. In the event of a malfunction or breakdown, grounding will reduce the risk of electric shock by providing a path of least resistance for the electric current.

Additional Grounding Procedure

Some local regulations may require a separate ground. In such cases, the required accessory ground wire, clamp and screw must be purchased separately. Never ground the appliance to plastic plumbing lines, gas lines or water pipes.

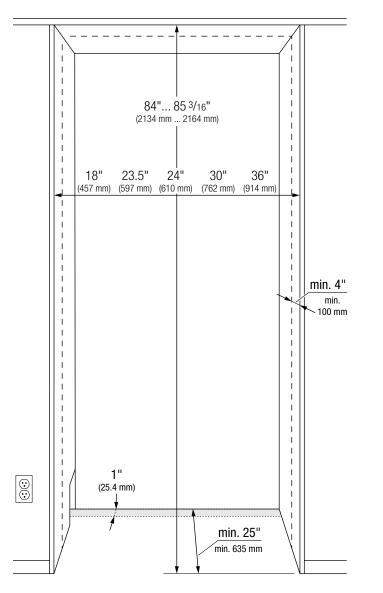

A 4-conductor cord shall be used when the appliance is installed in an area where local codes do not permit grounding through the neutral. Power supply cord must be replaced by a licensed electrician only.

Warning

Improper connection of the equipment grounding conductor may result in electric shock. Have the appliance checked by a qualified electrician or service technician if you are in doubt as to whether the appliance has been properly grounded.

Electrical Location

Connect the appliance to an outlet that is near the appliance. The outlet must be freely accessible following installation of the appliance.

PLANNING INFORMATION

Freedom[®] Collection

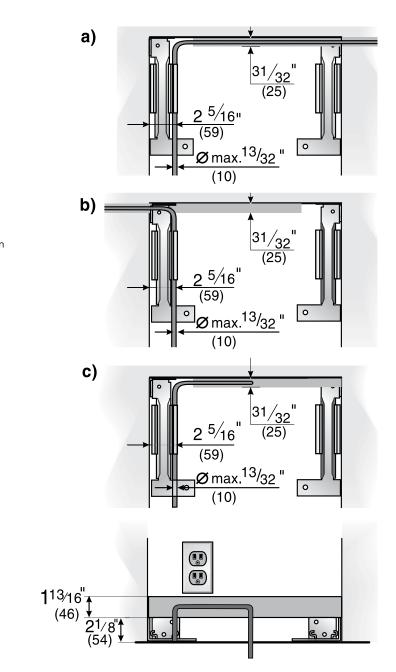

Water Location

A cold water connection is required for appliances that feature an ice maker or an ice and water dispenser.

The water pressure must be between 40 and 120 p.s.i. (2.75-8.25 bar). The installation must comply with local plumbing regulations.

A separate shut-off valve must be installed for the appliance water connection.

The shut-off valve for the water connection may not be behind the appliance. It is recommended to place the shut-off valve outside the cutout next to the appliance or in another easily accessible location. When installing the water connection, observe the permitted installation areas for the water supply line. The supply line can be located to the right (a), to the left (b), or underneath (c).

THERMADOR FREEDOM[®] REFRIGERATION

CABINETRY PLANNING INFORMATION

Freedom[®] Collection

Cabinetry Terms & Basic Requirements

To clarify the terms that are used in this design guide, please refer to the following definitions:

Case

This is the main body of a kitchen cabinet.

(Cabinet) Face Frame

This is a decorative frame at the front of a kitchen cabinet representing the space between cabinetry doors or drawers and is typical for North America. European style cabinets (frameless cabinetry) typically do not have a face frame.

Door Panel

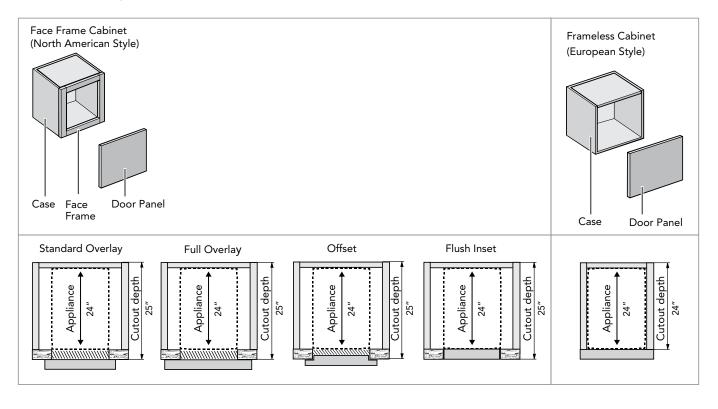

Able to be fully flush integrated when installed in 25" (635 mm) deep cabinets, Freedom[®] Collection refrigerators are intentionally designed to be equipped with custom door panels that perfectly match surrounding kitchen cabinetry. Typical panel thickness is **3/4**" (19 mm). However, thicker panels can be accommodated to emulate the look of the visible face frame (as in overlay) or to match existing kitchen cabinetry doors. When using custom panels, always ensure that the panel reverse is finished to match the exterior, as parts of the panel reverse will be visible when the refrigerator door is opened.

Kitchen Cabinetry Illustration

The cutout is the cavity in which a Freedom[®] Collection appliance is installed. The width of the cutout (18-inch, 23.5-inch, 24-inch, 30-inch or 36-inch) is dependent on the appliance(s). The total depth of the cutout is equal to the depth of the case plus face frame. It does not necessarily include the thickness of the door panel. For proper planning of cutout depth, please refer to pages 414–417.

Typically, the cutout for a Freedom[®] Collection appliance will be 25" (635 mm) deep. When planning the cutout, it is essential that the top and side interior walls be flush to the appliance at a minimum depth of 4" (102 mm) from the outer edge of the face frame and composed of thick (**5**/**8**" (16 mm) minimum) material for secure installation. Also, because the case interior will be partially visible when the refrigerator door is opened, always ensure that the top and side returns are finished to match the exterior furniture at the same minimum depth of 4" (102 mm).

CABINETRY PLANNING INFORMATION

Freedom[®] Collection

Cabinetry Style & Cutout Depth

Freedom® Collection refrigeration appliances are designed to accommodate nearly any type of kitchen cabinetry door installation. Generally, when using standard ¾" (19 mm) panels, 25" (635 mm) deep cutouts are recommended but the required cutout depth depends on the desired cabinetry and custom panel execution, whether typical North American styles that employ a face frame—requiring a depth of 25" (635 mm)—or European style—requiring a depth of 24" (610 mm).

The below cabinetry styles detail requirements for the cutout and custom panel.

A) Standard (Partial) Overlay – 25" (635 Mm) Cutout Depth With standard overlay kitchen cabinetry the face frame is an important design element. In order to emulate this aesthetic for the refrigerator, one must account for the door panel thickness (typically 3/4" (19 mm)) as well as the face frame thickness (here, also 3/4" (19 mm)). The resulting thickness of the custom door panel is therefore 3/4" (19 mm) + 3/4" (19 mm) = 1 1/2" (38 mm). The cumulative thickness of the custom door panel requires added depth in the cutout so 25" (635 mm) is recommended (see sketch).

B) Full Overlay - 25" (635 Mm) Cutout Depth

The requirements for standard overlays are also valid for full overlay designs so 25" (635 mm) cutout depth is recommended. However, especially if kitchen cabinet doors are thinner than 3/4" (19 mm) or reveals are 1/8" (3 mm) or smaller, a 24" (610 mm) cutout depth may also be acceptable. In this execution both the cabinet door and the small reveal of the fully overlaid face frame must be emulated within the typical appliance door panel thickness of 3/4" (19 mm). This can be done either a) by simply ignoring the visible area of the face frame (very small reveals show virtually no face frame) or b) by creating a "nose" on the custom door panel to emulate a small visible face frame (see sketch).

C & D) Offset & Flush Inset – 25" (635 Mm) Cutout Depth

Here, kitchen cabinetry door panels do not rest atop the cabinet face frame (overlay), but are instead inserted partially (offset) or fully flush (inset) into the face frame. Such offset or flush inset door panels require additional depth in the cutout. Using the example of a 3/4" (19 mm) thick panel, the complete cutout depth would be 24" (610 mm) + 3/4" (19 mm) = 24 3/4" (629 mm) and in this example 25" (635 mm) is recommended.

E) Framed – 24" (610 Mm) Cutout Depth

For Freedom® Collection refrigeration appliances, a metal frame (FRAMEKIT10) may be affixed to the side of the cabinet which conveniently hides unfinished case returns and provides a classic built-in look. This is particularly relevant for existing cabinetry that has not been custom-built to accommodate these appliances. A 24" (610 mm) cutout will result in a slightly protruding door panel for a typical built-in look.

F) European Style Kitchen Cabinetry -24" (610 Mm) Cutout Depth If the kitchen design is based on European style cabinetry, there is no need to emulate the look of a face frame, as such a frame is not an element of the kitchen cabinetry design. Therefore a 24" (610 mm) deep cutout with accompanying custom panel will always be sufficient.

A) Standard Overlay Design

Custom Door Panel (Emulating a Face Frame)

B) Full Overlay Design

Custom Door Panel with Nose (Emulating a Face Frame)

Important

It is strongly recommended the top interior of the cutout be of solid material (5/8" (16 mm) thickness). Ensure that the top well is completely flush for a depth of at least 4" (102 mm).

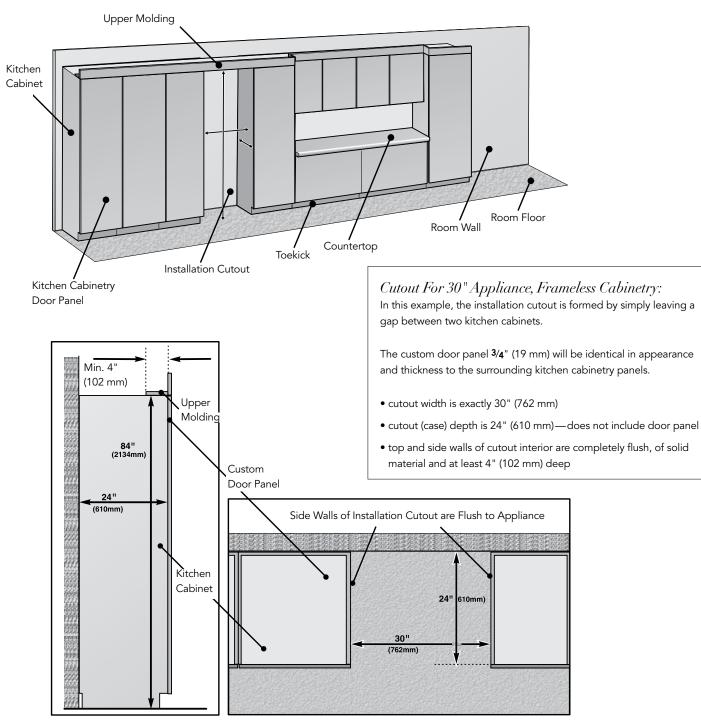

Ensure that the side walls of the cutout are also completely flush to a depth of at least 4" (102 mm).

If, for some reason, a separate cutout cabinet is created, ensure that the furniture return is at least 4" (102 mm) deep for proper installation.

CABINETRY PLANNING INFORMATION

Planning Example #1: Frameless (European) Cabinetry

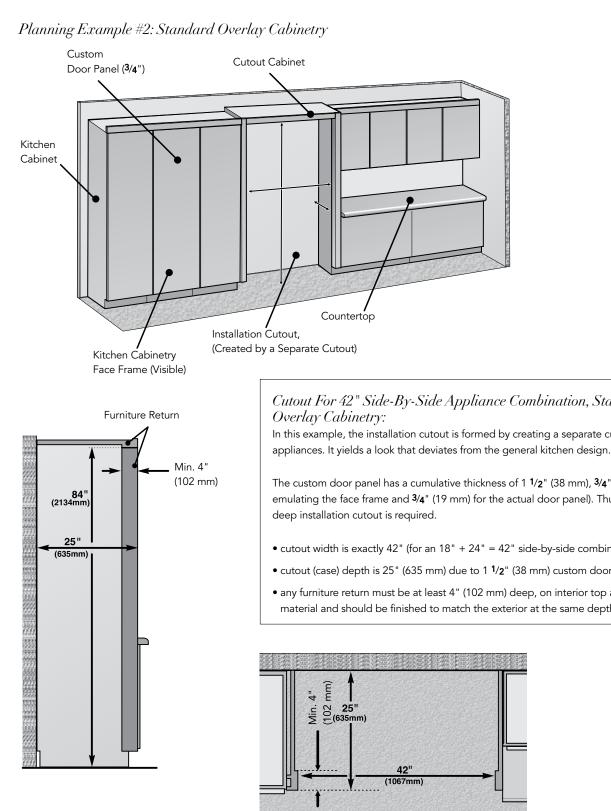

Installation Cutout (Vertical Section)

30-Inch Installation Cutout (Horizontal Section)

CABINETRY PLANNING INFORMATION

Freedom[®] Collection

Cutout For 42" Side-By-Side Appliance Combination, Standard

In this example, the installation cutout is formed by creating a separate cutout around the

The custom door panel has a cumulative thickness of 1 1/2" (38 mm), 3/4" (19 mm) emulating the face frame and 3/4" (19 mm) for the actual door panel). Thus, a 25" (635 mm)

• cutout width is exactly 42" (for an 18" + 24" = 42" side-by-side combination)

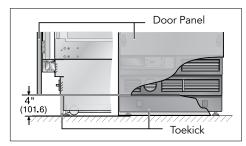

• cutout (case) depth is 25" (635 mm) due to 1 1/2" (38 mm) custom door panel

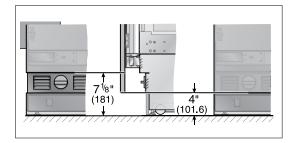

• any furniture return must be at least 4" (102 mm) deep, on interior top and sides, of solid material and should be finished to match the exterior at the same depth (4" or 102 mm)

Freedom[®] Collection

Toekick & Venting Grille

Each Freedom® Collection refrigeration appliance comes with a 4" (102 mm) tall stainless steel toekick. A custom-made toekick that matches the surrounding cabinetry may be applied instead. While standard toekick height is 4" (102 mm), depending on the usage of the leveling legs, the toekick height could vary. Regardless of toekick height, it is imperative that the venting grille remain unblocked to ensure proper functionality of the appliance. Decorative toekicks should be removable to allow for servicing.

Typical 4" (102 mm) toekick height. Velcro adhesive strips are used to fasten the toekick to the appliance. Venting grille and (if applicable) the water filter cavity are located above the toekick area.

Upper Molding

The planning of decorative upper molding above the cutout requires taking into account the actual or desired height of the door panel.

The overall height of the door panel will depend on:

- the height of the appliance, typically 84" (2134 mm)—leveling legs allow height adjustment ranging from -1/2" (-13 mm) to +1 3/8" (+35 mm)
- the installed height of the door panel (distance from the bottom edge of the door panel to the floor, typically 4" (102 mm), and, if desired, any extension of the custom panel above the appliance cutout)
- the appliance type (single door or bottom freezer)

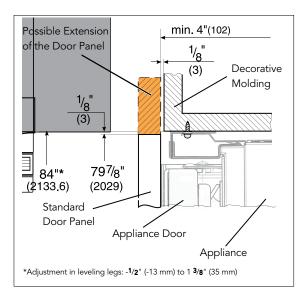

Important

Please recall that a panel should be installed at a minimum height of 4" (102 mm) from the floor to allow proper ventilation of the appliance.

Always ensure that the top of the cutout or upper decorative molding is at least 4" (102 mm) deep, so that the refrigerator can be properly secured to the cutout wall. This is particularly important if a protruding cutout is specially created and configured with a face frame. Furniture returns for any face frame must be a minimum of 4" (102 mm) deep.

If required by the surrounding cabinetry design, the distance between the bottom edge of the door panel and the floor can be increased from approx. 4" (102 mm) up to 7 1/8" (181 mm), but should not be decreased. Note, however, that the venting grille and (if applicable) water filter cavity will be visible, even if the door is closed.

Vertical Section. Side View:

INSTALLATION

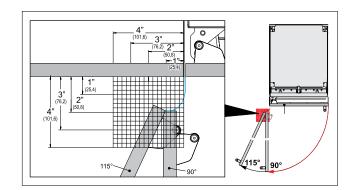

Freedom[®] Collection

Door Swivel Range

It is absolutely essential to ensure that the appliance is installed in such a way that the doors (including handles) and adjacent cabinets, countertops, pilasters, walls or other kitchen elements do not interfere with one another when opened. The illustrations below depict the swivel range of the Freedom® Collection refrigerator doors including mounted door panels of both 3/4" (19 mm) and 1 1/2" (38 mm) thickness. In the event of door interference the following solutions may be employed:

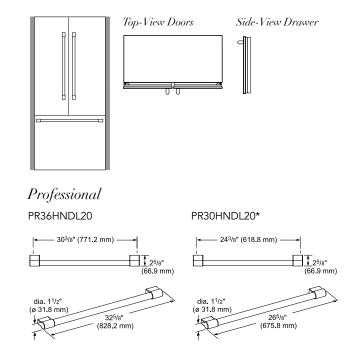

- Limit the refrigerator door opening angle to 90° with a door stop pin inserted into the hinge
- Reduce the door panel thickness (if larger than 3/4" (19 mm)).
- Install a spacer between the appliance and the kitchen element that creates the interference
- Rearrange the opposing kitchen element that creates the problem.
- Create a protruding cutout for the appliance.

PLANNING INFORMATION

Under-Counter Refrigeration

Model Options

The Under-counter Freedom® Refrigeration Collection includes a glass door refrigerator, a glass door wine reserve, a double refrigerator drawer unit and a double refrigerator / freezer drawer unit. Glass door models are available in right-hinged and left-hinged options. All units install fully flush to be seamlessly integrated into 24" depth cabinetry. Each unit is available custom-panel ready or in stainless steel with a Masterpiece® or Professional Handle to complement the entire collection of Thermador appliances.

Installation Considerations

Location

The appliance should be installed in a dry, ventilated room. It may not be installed outdoors. The ambient temperature of the room should stay between 55°F (13°C) and 110°F (43°C).

The appliance should not be exposed to excessive heat. If installation next to a heat source, such as an oven, radiator, etc. is unavoidable, observe the following minimum distances from the heat source:

- 1" (25 mm) from another refrigerator or wine reserve,
- 1 1/4" (30 mm) from an electric cooking appliance,
- 11 ¹³/16" (300 mm) from an oil or solid-fuel cooking appliance.

Ensure that the exterior air vent is not blocked by cabinetry or other elements.

Electrical Specifications

The appliance comes with a 3-wire power supply cord (NEMA 5-15p), UL-listed in the USA and requires a 3-wire receptacle that is fitted with a 15- or 20-Amp fuse.

Grounding Instruction

This appliance must be grounded. In the event of a malfunction or breakdown, grounding will reduce the risk of electric shock by providing a path of least resistance for the electric current.

Additional Grounding Procedure

Some local regulations may require a separate ground. In such cases, the required accessory ground wire, clamp and screw must be purchased separately. Never ground the appliance to plastic plumbing lines, gas lines or water pipes.

A 4-conductor cord shall be used when the appliance is installed in an area where local codes do not permit grounding through the neutral. Power supply cord must be replaced by a licensed electrician only.

Warning

Improper connection of the equipment grounding conductor may result in electric shock. Have the appliance checked by a gualified electrician or service technician if you are in doubt as to whether the appliance has been properly grounded.

Electrical Location

The receptacle must be near the appliance: 61" (1550 mm) to the right of the appliance or 37" (940 mm) to the left of the appliance, and also freely accessible following installation of the appliance for future service.

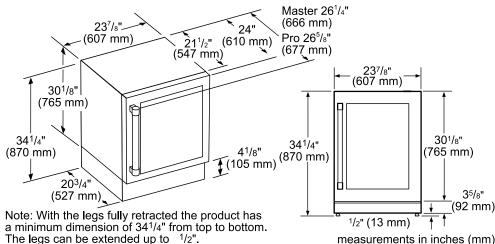

Water Supply

Units with an icemaker require a connection to a water supply. The pressure of the water supply coming out of a reverse osmosis system going to the water inlet valve of the refrigerator needs to be between 30 and 120 psi (207 and 827 kPa). If a reverse osmosis water filtration system is connected to your cold water supply the water pressure to the reverse osmosis system needs to be a minimum of 40 to 60 psi (276 to 414 kPa). Refer to the Installation Guide for details if the water pressure is less.

INSTALLATION

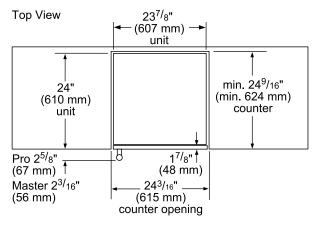

Under-Counter Refrigeration

Glass Door Refrigerator and Wine Reserve Product Dimensions

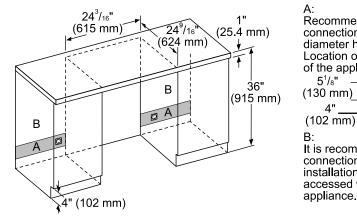

The legs can be extended up to 1/2".

Glass Door Refrigerator and Wine Reserve Cutout Dimensions

DISHWASHERS

FOR MASTERPIECE[®] & PROFESSIONAL COLLECTIONS

Featuring a suite of wifi-enabled dishwashers, The Radiance Collection offers unrivaled design complete with unparalleled drying capability, capacity, speed, and flexibility. And with customizable panels or stainless steel finishes, you're free to personalize your cleanup routine with industryleading dish care designed to suit your style.

Spotlight Feature

No one dries better—StarDry[™] with Zeolite[™] is an exclusive Thermador drying solution.

SAPPHIRE[®] DISHWASHER

Professional Handle Dishwasher 7 PROGRAMS, 7 OPTIONS – DWHD770WFP THERMADOR | DISHWASHEP

FEATURES

DISHWASHERS

Offering a suite of dish care that truly shines on every level, the Thermador Radiance Collection offers a variety of exceptional features across our portfolio.

Sapphire[®] Enhanced Features

★ Thermador[®] Connected Experience

With features such as Remote Start, start your dish cleaning cycle from your Home Connect[™] app to help prepare for your next dining occasion. Available on every dishwasher in our collection.

★ StarDry[™] with Zeolite[™]

Introducing StarDry with Zeolite, an exclusive Thermador drying solution. Without the use of chemicals, and with no need for replenishment, our StarDry with Zeolite can even dry containers with hard-to-reach crevices. No one dries better.

★ Push to Open

Make cleanup less of a chore—the dishwasher opens with either a push or pull, so loading is easier, even when your hands are full.

Quiet—42 dBA

The Sapphire Dishwasher is as easy on the ears as it is on the eyes so you can keep your focus on entertaining.

Adjustable Chef's Tool Drawer

Delight in added flexibility for a variety of tools with the adjustable Chef's Tool Drawer with flexible wings to accommodate utensils of different shapes and sizes.

★ Premium Touch Control Panel

The TFT screen offers a beautiful, full-color touchscreen display that lets you easily adjust settings.

★ Sapphire Glow®

Brilliant blue light illuminates when dishwasher is opened, giving just-cleaned stemware and dishes a luxurious glow.

FEATURES

DISHWASHERS

Topaz[®] Enhanced Features

Time Remaining PowerBeam®

Always know how much time is left in a cycle with the unique Time Remaining PowerBeam, providing a vibrant readout projected onto the floor below the dishwasher.

CrystalProtect® Water Softener System

Utilizes a built-in water softener to neutralize water hardness for perfectly clear crystal, free of water spots.

Quiet—44 dBA

The Topaz Dishwasher operates at only 44 dBA, so your dishwasher stays in the background while your meal takes center stage.

Flexible Folding Tines

Designed to accommodate large pots, pans and dishes the Topaz Dishwasher can handle extra-wide items, perfect for entertaining.

Emerald Features*

Chef's Tool Drawer®

Designed to clean an arsenal of tools—from spatulas and ladles—the dedicated Chef's Tool Drawer was developed to house an array of hard-to-place items.

3-Level Adjustable Rack

Whether you're washing extra-large items for a party or many small items for everyday use, the 3-Level Upper Rack is designed to be raised for stock pots or cookie sheets on the bottom rack, or lowered to fit taller wine glasses on the upper rack.

Blue PowerBeam®

The PowerBeam projects onto the floor to let you know when the dishwasher is in use.

Enhanced Racks

Rack stops and thicker rack wires allow for greater stability, so you can load the dishwasher with ease, even when you're washing heavier pots.

The VERSATILITY OF DESIGN

DISHWASHERS

With options for Stainless Steel paired with our Professional or Masterpiece® handles, or a custom panel with design of your choice, explore unique options to perfectly complement your kitchen design.

Flat Stainless Steel Panel with Masterpiece® Handle

Custom Panel to Match Your Cabinetry

Fully Flush Custom Panel Dishwashers

Custom Design

Match your kitchen's custom cabinetry to our dishwasher for complete integration. Thermador custom panel dishwashers install fully flush for a seamless, integrated look.

Protect Your Fine Wood Cabinets

Thermador dishwashers feature a unique condensation drying system designed to reduce the risk of steam damage over time to custom panel wood cabinetry and countertops. The closed system heats dishes with hot water from the final rinse resulting in the ultimate drying performance.

DWHD650WPR **EMERALD® 6-PROGRAM DISHWASHER CUSTOM PANEL**

Also Available In: DWHD650WFP – Flat Stainless Steel Panel with Professional Series Handle DWHD650WFM - Flat Stainless Steel Panel with Masterpiece[®] Series Handle

FEATURES & BENEFITS

- Chef's Tool Drawer (3rd Rack) is designed to make loading and unloading tools and hard to place items extraordinarily easier
- Sens-A-Wash® measures water cleanliness and adjusts wash cycle
- Three stage advanced filtration recirculates water for sparkling results
- 3-Level adjustable upper rack is customizable for all of your needs, designed to be raised for extra large items placed on the bottom rack, or lowered to fit taller wine glasses on the upper rack
- Extra Dry Option adds extra heat to the final rinse to enhance drying results
- Impressively Quiet®—48 dBA for peaceful kitchen experience
- Thermador Connected Experience by Home Connect brings exclusive dish features that keep you connected. Always.

PLANNING INFORMATION

Dishwashers

Model Options

There are five Thermador Dishwasher Collections to choose from in the Radiance Collection — Glass Care Center, Star Sapphire[®], Sapphire[®], Topaz[®], and Emerald[®]. All collections are available with a Masterpiece[®] or Professional Handle to perfectly match other Thermador appliances in your kitchen, or a custom panel option to fully integrate with your cabinetry. Be sure to reference the correct model information in this design guide.

Installation Options

Custom Door Panels

Thermador custom panel dishwashers can be installed fully flushed for a seamless, integrated look.

Fully integrated models allow you to have a custom door panel made to match your cabinetry. The custom door can be a two-piece configuration to look like a drawer at the top and a cabinet door at the bottom or like a single full-length door. A template is included with the fully integrated models to explain the mounting procedure.

NOTE: These dishwashers can accept custom door panel weights ranging from 7 to 24 lbs.; however, the dishwasher comes from the factory ready for custom panel door weights from 11 to 18 lbs. If you plan on using a door panel that is not 11 to 18 lbs., please contact customer service at (800) 944-2904.

Installation Considerations

The information in this design guide provides key features, product dimensions, cutouts and installation specifications. Before installing a Thermador Dishwasher, be sure to verify the cabinet dimensions, electrical connections and water connections. Also, always consult with the installation manual packed with the product for complete details before installing.

Thermador Dishwashers are designed to be enclosed on the top and both sides by standard residential kitchen cabinetry.

If the dishwasher is to be installed in a corner, make sure that there is adequate clearance to open the door.

Hot Water Supply

The hot water heater should be set to deliver approximately 120° F (49° C) water to the dishwasher. Water that is too hot can cause some detergents to lose effectiveness. Lower water temperatures will increase run times. The hot water supply pressure must be between 15 - 145 psi (1 - 10 bar).

All Thermador Dishwashers are ENERGY STAR[®] Certified

Electrical Specifications

This appliance must be grounded to a metal, permanent wiring system, or an equipment grounding conductor must be run with the circuit conductors and connected to the equipment grounding terminal or lead on the dishwasher.

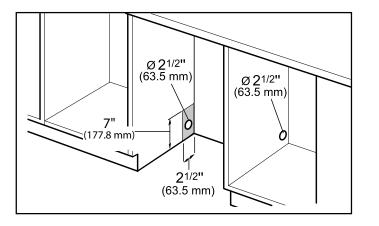

Model	Required Circuit Breaker
All Dishwasher Models	120 V, 60 Hz, 12 A

Water and Electrical Locations

For proper dishwasher operation and appearance, ensure that the enclosure is square and has the dimensions shown in the cutout drawings on the following page.

Select a location as close to the sink as possible for easy access to water supply and drain lines.

Make required openings to allow for passage of the water, drain and electrical line. In order to avoid interference with the dishwasher when sliding it into the cabinet, the holes should be cut within the 7 x 2.5" area shown.

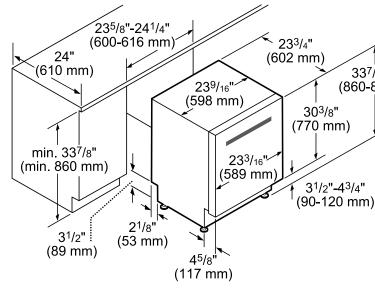

NOTE: Plumbing installations will vary - refer to local codes. The maximum length of the drain hose, including hose leading to air gap (if any) is 150" (380 cm). Ensure a portion of the drain hose is raised at least 33" (84 cm) above the floor to ensure proper draining.

FEATURES

BUILT-IN COFFEE MACHINE

★ Thermador[®] Connected Experience

With the *Thermador Connected Experience by Home Connect*[™] and remote access, your coffee fits seamlessly into your day. Customize operations, create 28 coffees from around the world, and get exclusive access to delicious coffee-inspired recipes—all from your phone or tablet.

Coffee Playlist

Using your mobile device, set your machine to make multiple cups of coffee consecutively, in the order you choose—so you can prepare drinks for each guest right from the dinner table, without ever missing a beat.

Coffee Customization

Perfect for frequent selections, coffee customization settings store up to 8 personalized beverages by name so family members and houseguests can program their favorite drinks—from a single shot espresso, to tea, to extra-large cappuccinos.

Automatic Double Shot Beverages

For days that require an added dose of verve, Automatic Double Shot delivers an extra shot of espresso to select beverages. Enjoy a consistently strong flavor and aroma at the touch of a button.

Automatic Cleaning

Cleanup has never been easier. Using both hot water and steam, the machine features a fully automatic rinse program at turn-on and turn-off, so it's always ready for the next freshtasting pour.

THERMADOR | BUILT-IN COFFEE MACHINE

FEATURES

BUILT-IN COFFEE MACHINE

Ceramic Disk Grinder

Enjoy freshly ground coffee for every cup with an exclusive Ceramic Disk Grinding System. Ceramic Disks deliver quality performance and minimize noise allowing for a smooth, consistent texture and flavor in every cup.

LCD Display

Full color LCD display illustrates beverage selection, including size and temperature control.

Installation Options

Plumbed

With an option for built-in drainage instead of a water tank, Thermador plumbed Built-in Coffee Machines help ensure your machine is ready when you are for your next cup. A water and drain connection eliminate the need to empty a drip tray, while water replenishment flows water directly into your machine from your plumbed water source, eliminating the need to fill a water container.

Non-Plumbed

Thermador non-plumbed Built-in Coffee Machines can be installed without an additional water line in your home enabling installation in the bedroom, guest room, office and beyond.

PLANNING INFORMATION

Built-In Coffee Machine, Professional & Masterpiece

Model Options

The Thermador Built-in Coffee Machine is available in two options for use in a plumbed or non-plumbed installation. Both models feature a stainless steel finish and design that coordinates with both the Professional and Masterpiece® collection. An optional trim kit is available for 30" cutout installations.

Installation Considerations

The information in this design guide provides key features, product dimensions, cutouts and installation specifications. Before installing a Thermador Built-in Coffee Machine, be sure to verify the cabinet dimensions and water / electrical connections. Also, always consult with the installation manual packed with the product for complete details before installing.

Installation Options

Plumbed

With a new option for built-in drainage instead of a water tank, Thermador plumbed Built-in Coffee Machines help ensure your machine is ready to operate. A water and drain connection eliminate the need to empty a drip tray, while water replenishment flows water directly into the machine from a plumbed water source, eliminating the need to fill a water container.

Non-Plumbed

Thermador non-plumbed Built-in Coffee Machines can be installed without an additional water line in the home—enabling installation in a bedroom, guest room, office and beyond.

Important

Make sure there is adequate ventilation. To do this, remove the rear panel or cut out an opening of 19 11/16" x 15 3/4" (500 x 400 mm). There must be a gap of at least 1 3/8" (35 mm) between the wall and base of the unit or the rear panel of the unit situated above.

The ventilation slots and intake openings must not be covered.

Also follow the installation instructions for the appliance situated above or below.

The ideal installation height for the fully automatic espresso machine, measured from the floor to the lower edge of the appliance, is 37 1/2" to 57" (95-145 cm).

If installing the appliance above a warming drawer, the height of the recess must be 23 1/4" (590 mm). If the appliance is installed directly under a décor panel, ensure that there is a ventilation slot of at least 31 square inches (200 cm2). The ideal installation height for the fully automatic coffee machine, measured from the floor to the lower edge of the appliance, is 37 7/16" (950 mm)

Electrical Specifications

Be sure your appliance is properly installed and grounded by a qualified technician. Installation, electrical connections and grounding must comply with all applicable local codes.

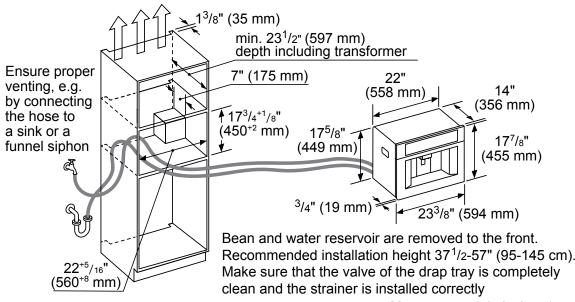

Thermador Built-in Coffee Machines are equipped with a 39-inch, 3-wire supply cord with a NEMA 5-15R plug. It is designed to be connected to a 120V AC, 60Hz, single phase power supply.

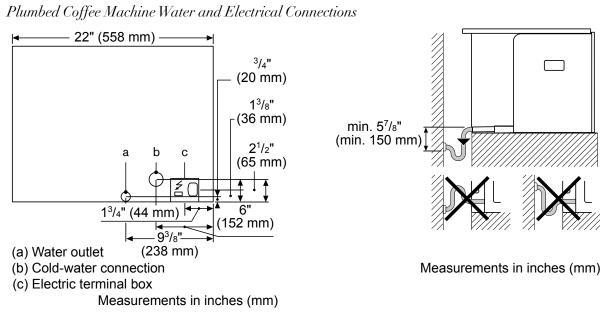

Model	Required Circuit Breaker
TCM24PS	120 V, 60 Hz, 15 A
TCM24TS	120 V, 60 Hz, 15 A

INSTALLATION
